No Place Distant Roads And Motorized Recreation On Americas Public Lands:

America's Public Lands Randall K. Wilson, 2020-02-25 How it is that the United States the country that cherishes the ideal of private property more than any other in the world has chosen to set aside nearly one third of its land area as public lands Now in a fully revised and updated edition covering the first years of the Trump administration Randall Wilson considers this intriguing question tracing the often forgotten ideas of nature that have shaped the evolution of America s public land system The result is a fresh and probing account of the most pressing policy and management challenges facing national parks forests rangelands and wildlife refuges today The author explores the dramatic story of the origins of the public domain including the century long effort to sell off land and the subsequent emergence of a national conservation ideal Arguing that we cannot fully understand one type of public land without understanding its relation to the rest of the system he provides in depth accounts of the different types of public lands With chapters on national parks national forests wildlife refuges Bureau of Land Management lands and wilderness areas Wilson examines key turning points and major policy debates for each land type including recent Trump Administration efforts to roll back environmental protections He considers debates ranging from national monument designations and bison management to gas and oil drilling wildfire policy the bark beetle epidemic and the future of roadless and wilderness conservation areas His comprehensive overview offers a chance to rethink our relationship with America s public lands including what it says about the way we relate to and value nature in the United States

No Place Distant David Havlick, 2002-03 Many roads provide a great service with relatively little harm but others offer few or no benefits while creating significant problems from habitat fragmentation to noise pollution to increased animal mortality

The Governance of Western Public Lands Martin Nie, 2008-02-08 Issues like clearcutting wilderness preservation and economic development have dominated debates over public lands for years yet we seem no closer to resolving these matters than we ever were Martin Nie now looks at why there continues to be so much conflict about public lands and resource management and how we can break through these impasses Showing that such conflicts have been driven by interrelated factors ranging from scarcity to mistrust and politics he charts the present status and future prospects of public lands management in America Nie looks closely at two of today s most intractable conflicts the designation of U S Forest Service roadless areas and management of the Tongass National Forest in Alaska He uses these cases to investigate more inclusive issues about governing federal lands in the West such as the contested use of science and litigation lengthy planning processes and controversial practices of Congress and the president in managing environmental disputes Along the way he addresses such other conflict areas as snowmobiles in Yellowstone bear and wolf protection fire and forest health drilling in Montana s Rocky Mountain Front and federal grazing policy Nie emphasizes the complicated and often contentious interaction between the branches of the federal government as a major factor in misunderstandings He particularly cites the problem of vague statutory language which tells our public land agencies little about what they should be doing but lots

about how they should be doing it Nie reexamines this confusing body of law and policy in which the rulemaking process wags the dog and agencies are caught in political quagmires to show how the pieces fit but more often don't Throughout the book Nie considers the factors that make some public land conflicts so controversial revisits how they have been dealt with in the past and proposes ways they might be better managed in the future Eschewing the single policy approach to public lands management such as encouraging free markets he instead surveys a diverse array of other available options His big picture outlook for the twenty first century is a bold call for reshaping ongoing conflicts and for reinvesting in our public lands

The Ecology of Transportation: Managing Mobility for the Environment John Davenport, Julia L. Davenport, 2006-06-30 Human transport by land sea and air has increased exponentially through time in intensity paralleling rises in population prosperity and rates of technological change Transport has considerable ecological effects many of them detrimental to environmental sustainability This volume brings together international experts from a variety of disciplines to review the ecological effects and their causes in terms of road rail ship and aircraft transport The contributors have different attitudes and agendas Some are ecologists some planners others social scientists Focus ranges from identification of threats and amelioration of damaging effects through to future design of transport systems to minimize environmental degradation Some chapters consider restricted areas of the globe others the globe itself Views encompass deep pessimism and cautious optimism

Controversial Issues in Adventure Programming Bruce Martin, Mark Wagstaff, 2012-05-04 *Controversial Issues in Adventure Programming* offers an engaging approach to the consideration of enduring current and emerging issues in the field Written primarily for upper level undergraduate and graduate students the text presents 20 issues in a debate format challenging students to participate in critical discourse concerning these issues as practitioners in the field of adventure programming Respected authors Bruce Martin and Mark Wagstaff have assembled a team of more than 50 contributors from around the globe to reassess some of the underlying assumptions on which adventure programming is based They have critically examined implications of new developments for emerging practice and discussed how best to position the field of adventure programming in addressing broader societal concerns To set the stage for the debate each issue is prefaced with a general overview including the evolution of the issue and its significance in light of broader social concerns Then contributors present the pros and cons of each issue A debate format helps students develop an understanding of the key points around each issue while also becoming familiar with current research pertinent to these issues This approach also encourages students to grapple with these issues and begin to develop their own informed thoughtful perspectives as they prepare for careers in adventure programming *Controversial Issues in Adventure Programming* is divided into two parts Part I begins by discussing issues of ongoing concern in the field including the certification debate motorized versus nonmotorized forms of outdoor recreation and program accreditation In part II contemporary and emerging issues are presented such as the use of online educational programming in the field of

adventure programming As a reference for practitioners and policy makers *Controversial Issues in Adventure Programming* offers new and updated perspectives on enduring and emerging issues as well as a synthesis of the most recent related scholarly literature In addition the text serves as a resource in understanding how the adventure programming industry can contribute to addressing issues of broad concern in society such as public health global climate change stewardship of public lands and waterways and education reform *Controversial Issues in Adventure Programming* encourages readers to participate in some of the central debates occurring in the field In particular this timely resource will help students broaden their understanding of the field as they critically examine and respond to a range of enduring contemporary and emerging topics in adventure programming

A Road Runs Through it Thomas Reed Petersen, 2006 This book explores what many consider to be the most important issue in the re wilding of America today roads Not highways but the 500 000 miles of roads built on federal forest lands to access natural resources and then abandoned when the resources were removed *A Road Runs Through It* features a collection of essays by some of today s finest nonfiction writers Peter Matthiessen Barry Lopez Janisse Ray David Quammen David Petersen Stephanie Mills William Kittredge and two dozen others Together they cover all aspects of roads and their impact on the wilderness As all royalties from this book are being donated to Wildlands CPR a nonprofit organization dedicated to protecting and reviving wild places by promoting road removal and re vegetation this book not only educates and informs on the issues of roads it becomes part of the solution Book jacket [Tahoe National Forest \(N.F.\), Motorized Travel Management](#) ,2010

Struggle Over Utah's San Rafael Swell Jeffrey O. Durrant, 2022-07-12 The vast public lands of the American West are being transformed today not geologically but conceptually A century ago visitors to western public lands were likely to be ranchers or miners Today the lands are popular destinations for campers hikers rock climbers river runners artists and off road vehicle enthusiasts These new visitors have proved to be a challenge for managers of public lands in particular the federal Bureau of Land Management Perhaps no area has been more affected by changing users and shifting policies than the San Rafael Swell a million acre expanse in southeastern Utah In this insightful and useful book Jeffrey Durrant follows the trail of decisions and events that have had and continue to have a transformative impact on this ancient land In detailing political and environmental squabbles over the San Rafael Swell Durrant illuminates issues that confront land managers bureaucrats and elected officials throughout the country He describes struggles between county commissioners and environmental activists conflicts over water rights proposals that repeatedly fail to gain government approval and political posturings Caught in the crossfire and often overwhelmed the Bureau of Land Management has seen its long time mission once centered on grazing and mining rights transmogrify into a new and to some unsettling responsibility for recreation and preservation The sandstone crags and twisting valleys of the San Rafael Swell present a formidable landscape but as this book clearly shows the political landscape may be even more daunting strewn with bureaucratic boulders and embedded with fixed positions on the functions and values of public land

Where the Rain

Children Sleep ,2010-05-01 Written in the tradition of Edward Abbey and Terry Tempest Williams this collection of essays inspired by a year spent hiking 120 desert canyons explores the sacred geography of the West discussing a wide range of issues from bears to spatial intelligence Protecting Yellowstone Michael J. Yochim,2013-04-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park s profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks
