Understanding Extreme Sports: A Psychological Perspective
Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30

Extreme sports: those activities that lie on the outermost edges of independent, adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon. Brymer, Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism. Giannoulakis, Pursglove 2017. Arguably, extreme sports now support a multi-billion dollar industry and the momentum seems to be intensifying. Traditional explanations for why extreme sports have become so popular are varied. For some, the popularity is explained as the desire to rebel against a society that is becoming too risk averse; for others, it is about the spectacle and the merchandise that is associated with organised activities and athletes. For others, it is just that there are a lot of people attracted by risk and danger or just want to show off. For others still, it is about the desire to belong to subcultures and the glamour that goes with extreme sports. Some seek mastery in their chosen activity and in situations of significant challenges. This confusion is unfortunate as, despite their popularity, there is still a negative perception about extreme sports participation. There is a pressing need for clarity. The dominant research perspective has focused on positivist, theory-driven perspectives that attempt to match extreme sports against predetermined characteristics. For the most part, empirical research has conformed to predetermined societal perspectives. Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation. This special edition brings together cutting-edge research and thought examining psychology and extreme sports with particular attention paid to the examination of motivations for initial participation, continued participation, effective performance, and outcomes from participation.
