Sharing in Virtual Organizations Gyamfi, Albert, Williams, Idongesit, 2019-01-25 Knowledge in its pure state is tacit in nature difficult to formalize and communicate but can be converted into codified form and shared through both social interactions and the use of IT based applications and systems Even though there seems to be considerable synergies between the resulting huge data and the convertible knowledge there is still a debate on how the increasing amount of data captured by corporations could improve decision making and foster innovation through effective knowledge sharing practices Big Data and Knowledge Sharing in Virtual Organizations provides innovative insights into the influence of big data analytics and artificial intelligence and the tools methods and techniques for knowledge sharing processes in virtual organizations The content within this publication examines cloud computing machine learning and knowledge sharing It is designed for government officials and organizations policymakers academicians researchers technology developers and students

Machine Learning and Modeling Techniques in Financial Data Science Chen, Haojun, 2025-01-22 The integration of machine learning and modeling in finance is transforming how data is analyzed enabling more accurate predictions risk assessments and strategic planning These advanced techniques empower financial professionals to uncover hidden patterns automate complex processes and enhance decision making in volatile markets As industries increasingly rely on data driven insights the adoption of these tools contributes to greater efficiency reduced uncertainty and competitive advantage This technological shift not only drives innovation within financial sectors but also supports broader economic stability and growth by improving forecasting and mitigating risks Machine Learning and Modeling Techniques in Financial Data Science provides an updated review and highlights recent theoretical advances and breakthroughs in professional practices within financial data science exploring the strategic roles of machine learning and modeling techniques across various domains in finance It offers a comprehensive collection that brings together a wealth of knowledge and experience Covering topics such as algorithmic trading financial technology FinTech and natural language processing NLP this book is an excellent resource for business professionals leaders policymakers researchers academicians and more *Essentials of Business Analytics* Bhimasankaram Pochiraju, Sridhar Seshadri, 2019-07-10 This comprehensive edited volume is the first of its kind designed to serve as a textbook for long duration business analytics programs It can also be used as a guide to the field by practitioners

The book has contributions from experts in top universities and industry. The editors have taken extreme care to ensure continuity across the chapters. The material is organized into three parts: A Tools, B Models, and C Applications. In Part A, the tools used by business analysts are described in detail. In Part B, these tools are applied to construct models used to solve business problems. Part C contains detailed applications in various functional areas of business and several case studies. Supporting material can be found in the appendices that develop the pre-requisites for the main text. Every chapter has a business orientation. Typically, each chapter begins with the description of business problems that are transformed into data questions, and methodology is developed to solve these questions. Data analysis is conducted using widely used software; the output and results are clearly explained at each stage of development. These are finally transformed into a business solution. The companion website provides examples, data sets, and sample code for each chapter.

Event Success Alon Alroy, Eran Ben-Shushan, Boaz Katz, 2022-03-17. Make events the most powerful marketing tool you have. In *Event Success: Maximizing the Business Impact of Physical, Virtual, and Hybrid Experiences*, Alon Alroy, Eran Ben Shushan, and Boaz Katz of Bizzabo draw on the knowledge they've gained powering events for companies like Amazon, Salesforce, and Uber to deliver an end-to-end playbook for readers wanting to maximize their organization's return on events. *Event Success* will help you unlock the full potential of your events and make them your most important marketing channel. You'll learn how to create elevated experiences in any format that drive strategic business goals, including:

- How to measure event success with surveys, data analytics, and key KPIs
- How to integrate events into a strategic end-to-end marketing plan
- How to collect, analyze, and funnel event data to other teams to drive business growth
- What events are successful, what the data says about them, and real-life examples from SAP, the Financial Times, IBM, and other leading brands that capture the imagination of their audiences through events

Event Success is ideal for marketers, event professionals, and anyone responsible for creating buzz, driving new sales, and building thought leadership with in-person, hybrid, or virtual events. It's also an invaluable resource for maximizing your organization's RoE or Return on Event with measurable increases in sales.
