**Protecting Privacy in China** Hao Wang, 2011-08-14 Today privacy is one of the most hotly debated topics worldwide. The book aims to balance the development of personal rights in a country that has historically valued collective rights over those of the individual. The protection of privacy is not an issue that has been emphasised during the rapid development of economic laws in China. However, the accompanying development of greater government based regulation of these laws implementation has led to greater invasions of personal privacy. This study attempts to provide a way forward for China to address the ever increasing concerns about the protection of privacy and puts forward a legislative model for protection. This is achieved after a thorough analysis of the threats to privacy protection in China, a critical evaluation of the level of current privacy protection in China and an analysis of the privacy laws in a series of developed nations based on common law and civil law.

*Privacy and Data Protection Law in China* Chengxin Peng, Guosong Shao, 2024-02-18 Derived from the renowned multi volume International Encyclopaedia of Laws, this practical guide to privacy and data protection law in China covers every aspect of the subject including the protection of private life as a fundamental constitutional right, the application of international and or regional conventions protecting the right to privacy, privacy rights in the context of electronic communications or at the workplace and the protection of individuals regarding the processing of personal data relating to them. Following a general introduction about the country, the monograph assembles its information and guidance in two parts: 1. protection of privacy including national case law regarding the protection of this fundamental right, specific legislation on the confidentiality of interpersonal communications and sector specific rules regarding privacy protection such as privacy rights of employees, patients, consumers or celebrities; 2. personal data protection including not only general rules on data quality, legitimate processing, data retention, data subject rights, security and accountability but also specific provisions regarding the processing of health data or other sensitive personal information, further processing for research purposes, exemptions for law enforcement or national security purposes and rules regarding liabilities, sanctions and redress.

*Privacy and Personal Data Protection Law in Asia* Adrian Mak, Ching Him Ho, Anselmo Reyes, 2024-12-12 Covering 16 Asian jurisdictions representing differing stages in the development of data protection regulatory systems, this book offers an in depth cross jurisdictional commentary on the developing world of Asian privacy and personal data protection with a special focus on private international law issues. It brings together an international team of contributors who reflect on the framework of data privacy and protection laws in their respective regions. Topics discussed range from the extent to which such laws may have extraterritorial effect or may conflict with the laws of other states to shortcomings of existing systems and their potential for improvement. More than a valuable contribution to comparative private law literature from an Asian perspective, the book also considers possible future trajectories for existing laws. It covers the extent to which Asian regimes will inevitably need to integrate with ever evolving privacy and personal data protection initiatives in the EU, the

USA and China It also assesses the extent to which existing regimes are sufficiently robust to handle the challenges of future technical developments in data collection and data transfer across borders especially in relation to the activities of giant corporations such as Meta Facebook Google Amazon Alibaba and Tencent The result is a wide ranging and forward thinking resource which provides practitioners and researchers with an account of data privacy law and personal data protection laws in Asia and their cross border implications as those regulations are now and as they might be in the future
