innovation as well as creates significant values Air transport is one of the most regulated industry The comprehension of its context requires the knowledge of the rules of international air law Air law is a qualitatively separated part of international law with peculiar structure which has evolved by drawing on the centuries old traditions of maritime law and has developed to be one of the youngest and the most up to date branch of jurisprudence Air law is an autonomous branch of law Its uniqueness derives from the extraordinarily rigorous requirements occasionally written by blood of aviation safety and aviation security The author guides the reader into this barely familiar secluded world of aviation via 31 illustrations and the presentation of 100 legal cases The volume relies on the several decades professional experience of the author Its objectives consist in the familiarisation of the public interested in aviation with this exceptionally intriguing area of international law in the support of the everyday work of experts in the area of aviation furthermore in the enhancement of the knowledge of theoretical and practical lawyers and broadening their horizons In this book the two most important founding treaties of international air law are introduced the Chicago Convention on International Civil Aviation 1944 and the Montreal Convention on the Unification of Certain Rules for International Carriage by Air 1999 furthermore mention is made of all significant aviation law treaties The Chicago and the Montreal Conventions are timeless sources of law since their meritorious amendment barely ensued therefore the relations and the legal solutions elucidated in the book are going to serve the reader for decades
