On Freud's Group Psychology and the Analysis of the Ego Ethel Spector Person, 2018-06-04 The sixth volume in the series Contemporary Freud Turning Points and Critical Issues published with the International Psychoanalytic Association turns to Group Psychology and the Analysis of the Ego 1921 In this classic text Freud offered an analysis of the roots of group identity of the contagions of panic and fanaticism and of the submission of the individual to the leader that only gained cogency with each passing decade of the troubled twentieth century And Freud's insights have become more relevant still in the aftermath of the shattering events of September 11 2001 Following an introduction to the volume by Ethel Spector Person and a summary and abridgement of Freud's text by John Kerr the contributors to this volume Didier Anzieu Robert Caper Abraham Zeleznik Andre Haynal Ernst Falzeder Yolanda Gampel and Claudio Laks Eisirik provide commentaries on Freud's work explicating the multiple ways in which Freud's insights continue to illuminate the irrational dynamics to which all groups including psychoanalytic institutions are prey Serving as both an introduction to and an elegant expansion of Freud's texts this volume demonstrates the role of psychoanalytic hypotheses in obtaining deeper insight into the tectonic shifts in group psychology underlying today's mass society **Classical Approaches to the Study of Religion** Jean Jacques

Bibliography Jacques Waardenburg, 2015-08-31 No detailed description available for Bibliography *José Carlos Mariátegui* Deni Alfaro Rubbo, 2024-09-30 This volume explores the life work and impact of the Peruvian thinker Jos Carlos Mariátegui 1894 1930 particularly his political biography his intellectual production and his critique of Eurocentrism This posthumous fame is based on the idea that in the whole of his political theoretical project the relationship between Latin America and Marxism was not built using a mechanical linking of effects and causes of the blatant copy of the theory produced in Europe of the immediate application of positivist formulas In this complex relationship enigmatic and insinuating a dissonant historical temporality emerged in Latin America The apparently unbalanced temporalities marked the matrix of capitalist exploitation but also present in Mariátegui's view glimmers of future possibilities This book is essential reading for scholars of social sciences and history interested in understanding the historical roots and political dilemmas of Latin American and European societies from the unique perspective of one of the greatest thinkers of the twentieth century

The Comintern and the Global South Anne Garland Mahler, Paolo Capuzzo, 2022-12-30 The Comintern and the Global South Global Designs Local Encounters studies the relations and productive tensions between the Third International

intellectual histories of racial justice and anti imperialism as well as other forms of internationalism Building on extant institutional histories of the Third International it moves in new directions by focusing on the points of intersection often conflictual and short lived with anti imperialist anti racist and nationalist organizing making the Third International a site of encounter between a global political project and more local and regional contexts Due to the broad range of geographic and linguistic expertise of the contributors this book traces routes of exchange that are often elided in existing studies of the Third International The chapters address how actors from Global South contexts shaped key debates on for example the role of Black Indigenous and migrant labor the Islamic question and the peasant question which challenged Bolshevik epistemological frameworks All such questions involved political subjectivities that the Comintern tried to reductively frame within a global revolution driven by Moscow resulting in the Comintern s ultimate disintegration Nevertheless this juncture between the Comintern s global designs and its local encounters left a significant legacy that would later be reconfigured in mid century anticolonial movements

Remembering and Forgetting the Ancient City Javier Martínez Jiménez, Sam Ottewill-Soulsby, 2022-03-24 The Greco Roman world is identified in the modern mind by its cities This includes both specific places such as Athens and Rome but also an instantly recognizable style of urbanism wrought in marble and lived in by teeming tunic clad crowds Selective and misleading this vision may be but it speaks to the continuing importance these ancient cities have had in the centuries that followed and the extent to which they define the period in subsequent memory Although there is much that is mysterious about them the cities of the Roman Mediterranean are for the most part historically known That the names and pasts of these cities remain known to us is the product of an extraordinary process of remembering and forgetting stretching back to antiquity that took place throughout the former Roman world This volume tackles this subject of the survival and transformation of the ancient city through memory drawing upon the methodological and theoretical lenses of memory studies and resilience theory to view the way the Greco Roman city lived and vanished for the generations that separate the present from antiquity This book analyzes the different ways in which urban communities of the post Antique world have tried to understand and relate to the ancient city on their own terms examining it as a process of forgetting as well as remembering Many aspects of the ancient city were let go as time passed but those elements that survived that were actively remembered have shaped the many understandings of what it was In order to do so this volume assembles specialists in multiple fields to bring their perspectives to bear on the subject through eleven case studies that range from late Antiquity to the mid twentieth century and from the Iberian Peninsula to Iran Through the examination of archaeological remains changing urban layouts and chronicles travel guides and pamphlets they track how the ancient city was made useful or consigned to oblivion
