From the FOREWORD by Dan G Blazer M D Ph D Professor of Psychiatry Duke University Medical Center Occasionally a writer on psychology and biblical faith comes along who can work from the center J Christopher Garrison is such a writer Let me explain what I mean by working from the center No person who is thoroughly committed to his or her religious faith can really put that faith aside and work with scientific objectivity in blending the essence of that faith with the subject matter of empirical science Even if someone could I doubt that the project would be of great interest Such a person would not be someone I would define as working from the center A person who can work from the center in blending psychology and biblical faith is a person who can work not so much from the center of extremes as from the center of their being from their spirit if you will This ability shows itself when one has opened his or her innermost being to the Spirit of God and his or her mind and reason to modern psychology and truly grasped as a result the principles and concepts of what psychology is really about This is what Garrison has achieved In Garrison s Psychology of the Spirit psychology is not so much integrated as it is enriched Reading the end product deepens one s faith and one s understanding Such a psychology is not the mere providing of formulas for meeting daily life crises It is instead the total unfolding and renewal of one s inner being EBOOK: Psychology: The Science of Mind and Behaviour Nigel Holt, Andy Bremner, Ed Sutherland, Michael Vliek, Michael Passer, Ronald Smith, 2015-02-16 Psychology The Science of Mind and Behaviour is here with a new fully updated and revised third edition Bringing new developments in the field and its renowned pedagogical design the third edition offers an exciting and engaging introduction to the study of psychology This book s scientific approach which brings together international research practical application and the levels of analysis framework encourages critical thinking about psychology and its impact on our daily lives Key features Fully updated research and data throughout the book as well as increased cross cultural references Restructured Chapter 3 on Genes Environment and Behaviour which now starts with a discussion of Darwinian theory before moving on to Mendelian genetics Core subject updates such as DSM 5 for psychological disorders and imaging techniques on the brain are fully integrated Revised and updated Research Close Up boxes Current Issues and hot topics such as the study of happiness and schizophrenia intelligence testing the influence of the media and conflict and terrorism are discussed to prompt debates and questions facing psychologists today New to this edition is Recommended Reading of both classic and contemporary studies at the end of chapters Connect Psychology a digital teaching and learning environment that improves performance over a variety of critical outcomes easy to use and proven effective LearnSmart the most widely used and intelligent adaptive learning resource that is proven to strengthen memory recall improve course retention and boost grades SmartBook Fuelled by LearnSmart SmartBook is the first and only adaptive reading experience available today EBOOK: Psychology: The Science of Mind and Behaviour, 4e Nigel Holt, Andy Bremner, Ed
