Shifting Power in Asia-Pacific? Enrico Fels, 2016-11-03 This book investigates whether a power shift has taken place in the Asia Pacific region since the end of the Cold War By systematically examining the development of power dynamics in Asia Pacific it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour With a special emphasis on Sino US competition the book explores the alleged linkage between the regional

distribution of relevant material and immaterial capabilities national power and the much cited regional power shift The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power CIAP that includes 55 variables for 44 regional countries and covers a period of twenty years Moreover it develops a middle power theory that outlines the significance of middle powers in times of major power shifts By addressing political military and economic cooperation via a structured focused comparison and by applying a comparative historical analysis the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing *The Dynamics of Coercion* Daniel Byman,Matthew Waxman,2002-02-04 Successful coercion should be relatively simple for the United States Since the demise of the Soviet Union the United States is without rivals in military might political influence or economic strength Yet despite the lopsided US edge in raw power regional foes persist in defying the threats and ultimatums brought by the United States and its allies This book examines why some attempts to strong arm an adversary work while others do not It explores how coercion today differs from coercion during the Cold War It describes the constraints on the United States emanating from the need to work within coalitions and the restrictions imposed by domestic politics and it assesses the special challenges likely to arise when an adversary is a non state actor or when the use of weapons of mass destruction is possible

Well-Oiled Diplomacy Adam N. Stulberg, As a window into understanding the relationship between globalization and the pursuit of national security Adam N Stulberg examines Russia s mixed success at leveraging energy advantages in Eurasia from 1992 to 2002 Stulberg supplements traditional analyses of statecraft by highlighting indirect market and regulatory mechanisms for altering the behavior of foreign and subnational actors as well as by demonstrating the usability of soft power and global networks The power of this new theory of strategic manipulation is illustrated in several case studies including Russia s successful natural gas diplomacy toward Turkmenistan and Kazakhstan Russia s troubled oil diplomacy toward Azerbaijan and Kazakhstan and Russia s mixed success with commercial nuclear diplomacy toward

Psychology of War and Peace** Fred van Houten,2013-06-29 Can a Baby Be an Enemy Our world is in a deep prolonged
crisis The threat of global nuclear war the chronic condition of local wars the imperilled environment and mass starvation
are among the major forms this crisis takes The dangers of massive overkill overexploitation of the environment and
overpopulation are well known but surprisingly little has been said about their potential interactions their bearing upon each
other If there were to be a nuclear confrontation between today's superpowers it might not take place in today's world but in
a far less friendly habitat such as the world may be some decades hence And it need hardly be added that the era of this

necessarily less threatening To understand and cope with our situation we need correspondingly serious reflection This
