Psychiatric Epidemiology Searching For The Causes Of Mental Disorders Oxford Psychiatry Series:

Psychiatric Epidemiology Ezra Susser M.D., Sharon Schwartz, Alfredo Morabia M.D., Evelyn J. Bromet, 2006-06-01

Searching for the causes of mental disorders is as exciting as it is complex. The relationship between pathophysiology and its overt manifestations is exceedingly intricate and often the causes of a disorder are elusive at best. This book is an invaluable resource for anyone trying to track these causes whether they be clinical researchers, public health practitioners or psychiatric epidemiologists in training. Uniting theory and practice in very clear language, it makes a wonderful contribution to both epidemiologic and psychiatric research. Rather than attempting to review the descriptive epidemiology of mental disorders, this book gives much more dynamic exposition of the thinking and techniques used to establish it. Starting out by tracing the brief history of psychiatric epidemiology, the book describes the study of risk factors as causes of mental disorders. Subsequent sections discuss approaches to investigation of biologic, genetic or social causes and the statistical analysis of study results. The book concludes by following some of the problems involved in the search for genetic causes of mental disorders and more complex causal relationships.

Psychiatric Epidemiology Evelyn J. Bromet, Alfredo Morabia, Sharon Schwartz, Ezra S. Susser, 2006. Starting out by tracing the brief history of psychiatric epidemiology, this text describes the study of risk factors as causes of mental disorders. Subsequent sections discuss approaches to investigation of biologic, genetic or social causes and the statistical analysis of study results.

Search for the Causes of Schizophrenia Heinz Häfner, Wagner F. Gattaz, 2012-12-06 H HAFNER and W F GATTAZ Between 1891 and 1955 three founders of modern psychiatry Emil Kraepelin 1856 1926 Karl Jaspers 1883 1969 and Kurt Schneider 1887 1967 lectured at the University of Heidelberg Kraepelin for 12 years Jaspers for over 25 years and Schneider for approximately 10 years During this period they laid the foundations of descriptive psychopathology and modern classification and contributed essentially to the development of our current thinking on schizophrenia In 1986 on the occasion of the 600th anniversary of the University of Heidelberg we held a symposium in memory of these three giants of psychiatry for which we chose the title Search for the Causes of Schizophrenia It was jointly organized by the Central Institute of Mental Health in Mannheim and the Department of Psychiatry of the University of Heidelberg The intention was to meet one of the major challenges of current psychiatric research namely the fact that since Kraepelin's masterly description of Dementia praecox 1894 and E Bleuler's slightly different definition of schizophrenia 1911 we have made only insufficient advances in clarifying the aetiology of this frequent and still often disabling mental disease
