Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L.

Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students' interests, perceptions, and motives; students' existing knowledge of psychology including their misconceptions; a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

Teaching Social Studies James Little, Gerald L. Wilson, Virginia Wilson, 1993-01-30 Just as society has changed dramatically over the last century so have the social sciences. This valuable reference chronicles the historical development of social studies as a discipline in elementary and secondary schools. It also assesses the current state of teaching and research in the social sciences and history at the pre-college level and it charts new directions for the future of social studies in secondary and elementary schools. By tracing the historical development of social studies, the reference indicates how social studies has constantly been redefined to meet the changing needs and expectations of society. At the same time, the historical context provided by the authors sheds new light on the current state of social studies in the curriculum and the development of social studies in the future. The book begins with introductory chapters that overview themes and issues common to all areas of history and the social sciences. The chapters that follow summarize and assess the developments and trends of particular fields commonly thought to constitute social studies. The volume concludes with chapters on broad topics including the place of religion in the social studies curriculum, the role of writing in history and the social sciences, and the professional training of social studies teachers. Each chapter begins with a section of reflections on the development of the discipline, followed by a section on current issues and trends, followed by a final section of projections for the future of the discipline. The result is a comprehensive overview of the past, present, and future of social studies in elementary and secondary schools and an indispensable reference for educators, historians, and social scientists.

International Handbook of Research

Methods And Statistics (Volume 5) Urfat Anjem Mir, Sonam Joldan, Vinay Kumar, Sonia Saini, The International Handbook of Research in Statistics Education provides a comprehensive global overview of the latest research trends and practices in the teaching and learning of statistics Edited by Dani Ben Zvi Katie Makar and Joan Garfield this handbook brings together leading scholars to explore foundational theories innovative methodologies and emerging challenges in statistics education Covering topics such as statistical reasoning learning trajectories teacher development curriculum design and the role of technology the book serves as a critical resource for researchers educators curriculum developers and policymakers Rich with evidence based insights and international perspectives it offers both theoretical depth and practical applications making it an essential guide for advancing the field of statistics education *Longitudinal Integrated Clerkships* Alliance for Clinical Education, 2016-10-06 Dr Poncelet and Dr Hirsh eagerly developed an encyclopedic chapter for the 4th edition of the Guidebook for Clerkship Directors and it seemed logical and proper to grow that chapter which had been truncated for the Guidebook into this book They have assembled the leading international experts in the field of the medical school longitudinal integrated curriculum who in turn have generated what we are sure will be considered the ultimate resource for these experiences This book fills a significant void in the medical education literature **Social and Psychological Consequences of Violent Victimization** R. Barry Ruback, Martie P. Thompson, 2001-05-23 The book achieves its goal of encouraging the reader to think broadly about how the consequences of violent victimization can be measured understood and prevented The authors also achieve their goal of emphasizing the need for multiple research methods and multiple theoretical perspectives for understanding the effects and implications of violent crime The book would certainly be a useful resource for students studying psychology or criminology and is likely to be of interest to professionals who work with victims of violent crime **CRIME PREVENTION AND COMMUNITY SAFETY AN INTERNATIONAL JOURNAL** What are the effects that violent crime has on our everyday lives both in terms of the individual victims and their larger community This unique text draws from both the fields of criminology and psychology to provide a comprehensive examination of the two major areas that are most significantly effected by violent crime the crime victims themselves and the larger sphere of their families friends neighborhoods and communities Beginning with a discussion of the how we measure and study violent victimization the authors R Barry Ruback and Martie P Thompson look at the immediate and long term impact violent acts has upon the direct victims **Social and Psychological Consequences of Violent Victimization** examines secondary victims family members neighbors friends and the professional involved with investigating and prosecuting the crime and helping the victim and also impacts of violent crime on neighborhoods and communities The authors conclude with recommendations of effective interventions that can be made at the levels of the individual the community and the criminal justice and mental health systems This book s one of a kind focus on both the psychological and social impact of crime makes it an invaluable supplementary text for criminal justice and criminology courses dealing with victimization violent crimes and
