Revolutions In Development Inquiry:

Revolutions in Development Inquiry Robert Chambers,2008 Robert Chambers draws together and reviews the revolutionary changes in the methodologies and methods of development inquiry that have occurred and reflects on their transformative potential for the future

Revolutions in Development Inquiry Robert Chambers,2012 Robert Chambers returns with a new book that reviews together for the first time some of the revolutionary changes in the methodologies and methods of development inquiry that have occurred in the past forty years and reflects on their transformative potential for the future This book breaks new ground by describing and analysing the evolution of a sequence of approaches Starting with the dinosaurs of large scale multi subject questionnaire surveys and the biased visits and perceptions of rural development tourism and urban based professionals there follows a look at the explosive proliferation of methodologies and methods of recent years These include rapid rural appraisal RRA participatory rural appraisal PRA and dramatic developments in the still largely unrecognized fields of participatory numbers and statistics and of participatory mapping and GIS Chambers shows how these can empower local people and provide rigorous and valid substitutes for some more traditional methods of inquiry Also presented is a repertoire for offsetting the biases of the urban trap which has become so serious for officials and aid agency staff Importantly Chambers points out that we are now in a different space methodologically from a few years ago He makes the case that participatory methodologies evolved through creative and eclectic pluralism can be a transformative wave for the future as drivers of personal professional and institutional change This book is for all who are concerned with development regardless of profession discipline or organization who seek to be abreast of the revolutionary breakthroughs in approaches and methods of inquiry of recent years and what Chambers calls their unlimited potentials Published with IDS

Understanding Global Development Research Gordon Crawford,Lena Kruckenberg,Nicholas Loubere,Rosemary Morgan,2017-01-26 For experienced and inexperienced researchers and practitioners alike this engaging book opens up new perspectives on conducting fieldwork in the Global South Following an inter disciplinary and inter generational approach Understanding Global Development brings into dialogue reflections on fieldwork experiences by leading scholars along with accounts from early career researchers Contributions are organised around six key issues Meaningful participation in fieldwork Working in dangerous environments Gendered experiences of fieldwork Researching elites Conducting fieldwork with marginalised people Fieldwork in development practice The experience led discussion of each of the topics conveys a sense of what it actually feels like to be out in the field and provides readers with useful insights and practical advice A relational framework highlights issues relating to power identity and ethics in development fieldwork and encourages reflection on how researcher engagement with the field shapes our understanding of global development

50 Years of Green Revolution M. S. Swaminathan, 2017-03-14 The green revolution in India about 50 years ago transformed India's image then as begging bowl to bread basket This transformation during the 1960s took just about 4 years The yield increases achieved in wheat and then in rice which occurred in just about half decade is far in excess of the yield increases during the preceding 4000 years This remarkable feat was achieved with the leadership of the author using the dwarf wheat types which had been produced by Norman Borlaug in Mexico The research and development of green revolution of wheat and rice at the Indian Agricultural Research Institute New Delhi was led by the author along with his team of students and co workers He has published over 100 papers on green revolution and the ever green revolution which is a refinement of the former This book is a compilation of just about 40 of his numerous research papers monographs and books published by him on this subject The papers in this book bring out the scientific basis of the modification of the plant type so as to be responsive to exogenous addition of chemical fertilizers and irrigation The ideal plant type enables capture of adequate sunlight and using the chemical fertilizers added to the soil produce substantial photosynthetic starch And because the plants have short and thick culm they are able to withstand enormous amounts of grains in their ears This indeed was the basis of breaking the yield barriers associated with native varieties The book also brings out that green revolution had established the food security at the national level but not at the individual household levels of millions of resource poor rural small and marginal farming fishing and landless families Further green revolution was commodity centric and the manner of its practice led to environmental degradation and social inequities This author realized as early as 1972 that system of agriculture in India should be designed to fight both the famines of food and rural livelihoods In pursuit of it this author further designed an evergreen revolution with systems approach What this means is providing concurrent attention to ecological foundations of agriculture and the livelihoods of the rural people The book also brings out that green revolution was a team effort involving scientists policy makers administrators farmers and students This book is an outstanding example of green revolution providing a breathing space by
