Margaret Atwood's Dystopian Fiction Sławomir Kuźnicki,2017-05-11 This volume details Margaret Atwood's dystopian novels through the themes of the ambivalent ethics of science and technology the position of women in the male dominated world and the ambiguous role played by religion and spirituality The book's unique and original approach places Atwood's fiction within the contemporary world with all the problems of our fast changing reality Furthermore it provides an excellent reading of her dystopias in a broader humanist context with an emphasis on the social cultural and political issues that have been important for both her the writer and us the readers The SAGE Handbook of Feminist Theory Mary Evans,Clare Hemmings,Marsha Henry,Hazel Johnstone,Sumi Madhok,Ania Plomien,Sadie Wearing,2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and

the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences *Green Light* George Gessert, 2012-02-10 How humans aesthetic perceptions have shaped other life forms from racehorses to ornamental plants Humans have bred plants and animals with an eye to aesthetics for centuries flowers are selected for colorful blossoms or luxuriant foliage racehorses are prized for the elegance of their frames Hybridized plants were first exhibited as fine art in 1936 when the Museum of Modern Art in New York showed Edward Steichen s hybrid delphiniums Since then bio art has become a genre artists work with a variety of living things including plants animals bacteria slime molds and fungi Many commentators have addressed the social and political concerns raised by making art out of living material In *Green Light* however George Gessert examines the role that aesthetic perception has played in bio art and other interventions in evolution Gessert looks at a variety of life forms that humans have helped shape focusing on plants the most widely domesticated form of life and the one that has been crucial to his own work as an artist We learn about pleasure gardens of the Aztecs cultivated for intoxicating fragrance the aesthetic standards promoted by national plant societies a daffodil that looks like a rose and praise for weeds and wildflowers *Margaret Atwood* Shannon Hengen, Ashley Thomson, 2007-05-22 Authors Shannon Hengen and Ashley Thomson have assembled a reference guide that covers all of the works written by the acclaimed Canadian author Margaret Atwood since 1988 including her novels *Cat s Eye* *The Robber Bride* *Alias Grace* and the 2000 Booker Prize winner *The Blind Assassin* Rather than just including Atwood s books this guide includes all of Atwood s works including articles short stories letters and individual poetry Adaptations of Atwood s works are also included as are some of her more public quotations Secondary entries i e interviews scholarly resources and reviews are first sorted by type and then arranged alphabetically by author to allow greater ease of navigation The individual chapters are organized chronologically with each subdivided into seven categories Atwood s Works Adaptations Quotations Interviews Scholarly Resources Reviews of Atwood s Works and Reviews of Adaptations of Atwood s Works The book also includes a chapter entitled *Atwood on the Web* as well as extensive author and subject indexes This new bibliography significantly enhances access to Atwood material a feature that will be welcomed by university public and school librarians *Margaret Atwood A Reference Guide* 1988 2005 will appeal not only to Atwood scholars but to students and fans of one of Canada s greatest writers *Psychoanalysis of Technoscience* Hub Zwart , 2019 This book presents a psychoanalysis of technoscience Basic concepts and methods developed by Freud Jung Bachelard and Lacan are applied to case histories palaeoanthropology classical conditioning virology Rather than by disinterested curiosity technoscience is driven by desire resistance and the will to control Moreover psychoanalysis focusses on primal scenes Dubois quest for the missing link Pavlov s discovery of the conditioned reflex and opts for triangulation comparing technoscience to different scenes provided by novels so that Dubois s work is compared to missing link novels by Verne and London and Pavlov s experiments with Skinner s *Walden Two* while

virology is studied through the lens of viral fiction *Margaret Atwood* J. Brooks Bouson, 2010-01-01 Understanding Contemporary American Science Fiction Darren Harris-Fain, 2005 Understanding Contemporary American Science Fiction The Age of Maturity 1970 2000 explores the major trends and developments during three decades that witnessed science fiction's most dramatic progression from subliterate escapist entertainment to a more sophisticated literature of ideas. Darren Harris-Fain suggests that to understand American science fiction fully it is essential to realize that the current field with all its variety results from the preceding decades of writings. In addition, he contends that although much science fiction of merit was written in America prior to 1970, the latter decades of the twentieth century witnessed a dramatic improvement in quality even as the field fragmented into a variety of subgenres and as writers sought to transcend earlier critical dismissals. Harris-Fain discusses significant and representative works, most of which mainstream literary scholars and critics ignore, as he charts the historical and literary development of contemporary American science fiction, the internal divisions along both literary and political lines experienced during the Vietnam era, the influence of the feminist movement and other contemporary concerns, the increasing contributions of female African American and gay and lesbian writers, and the emergence of such significant trends as hard science fiction, cyberpunk, alternate history, and shared world stories. Harris-Fain also considers literary science fiction's relationship to the mass media, the effects the popularity of fantasy has on the field, and academia's continued misprizing of the genre.
