27 March 2021

Ophthalmic history taking is an important skill that is often assessed in OSCEs. This guide provides a structured approach to exploring common ophthalmic complaints such as **visual disturbance**, **red eye** and **eye pain** in an OSCE setting.

Download the ophthalmic history taking PDF OSCE checklist, or use our interactive OSCE checklist.

Opening the consultation

Wash your hands and **don PPE** if appropriate.

Introduce yourself to the patient including your **name** and **role**.

Confirm the patient's **name** and **date of birth**.

Explain that you'd like to take a history from the patient.

Gain consent to proceed with history taking.

General communication skills

It is important you do not forget the **general communication skills** which are relevant to all patient encounters. Demonstrating these skills will ensure your consultation remains patient-centred and not checklist-like (just because you're running through a checklist in your head doesn't mean this has to be obvious to the patient).

Some **general communication skills** which apply to all patient consultations include:

- Demonstrating empathy in response to patient cues; both verbal and non-verbal
- Active listening: through body language and your verbal responses to what the patient has said
- An appropriate level of eye contact throughout the consultation
