Our Chemical Selves Gender Toxics And Environmental Health:

Our Chemical Selves Dayna Nadine Scott, 2015-02-25 Chemicals found in homes schools and workplaces are having devastating consequences on human health and the environment *Our Chemical Selves* examines the gender dynamics associated with these everyday toxic exposures Written by leading researchers in science law and public policy the chapters in *Our Chemical Selves* reveal that while exposures to chemicals are pervasive and widespread people from low income racialized and Indigenous communities face a far greater risk of exposure At the same time the risks associated with these exposures and the burdens of managing them rest disproportionately on the shoulders of women This collection hones in on the political economy of pollution by critically examining the system that manufactures the chemicals and the social political and gender relations that enable harmful chemicals to continue being produced and consumed It also demonstrates the urgent need to revise existing approaches to the regulation of toxics including Canada's current Chemicals Management Plan

Wordsworth,2024-09-02 Drawing on our growing knowledge of animal cognition this book provides a critical analysis of the use of animals in the legal regime and the practice of toxicity testing Although animal abuse has become a major issue animal testing remains largely in the shadows even though it involves substantial cruelty Toxicity testing in particular imposes considerable pain suffering and ultimately death on those laboratory animals often mice chosen to demonstrate the characteristics of chemicals and their commercial potential This book documents and critically analyzes the animal protection laws of the European Union the United States and Canada It not only examines the tests themselves and the suffering they inflict on animals but also exposes the failure of both the testing and the toxicity laws to effectively protect human health and the environment Finally the book takes up the potential of alternative non animal testing methods to replace the current regimen and to reduce current damage to health and the environment This book will be of interest to scholars and researchers in the fields of animal studies environmental law and sociolegal studies as well as activists and others with an interest in ethics and animal rights **Toxic Sexual Politics** Melina Packer,2025-01-28 Toxic Sexual Politics uses historical and contemporary evidence to show how the U S science of toxicology is a tool designed by and for the chemical industry suggesting that public health will never win the industry s game What if instead the science of toxicants explicitly confronted chemical corporate power building from queer feminist anti ableist and anti racist movements for environmental and reproductive justice **Better Safe Than Sorry** Norah MacKendrick,2018-05 How toxic are the

products we consume on a daily basis Whether it s triclosan in toothpaste formaldehyde in baby shampoo endocrine disruptors in water bottles or pesticides on strawberries chemicals in food and personal care products are of increasing concern to consumers This book chronicles how ordinary people try to avoid exposure to toxics in grocery store aisles using the practice of precautionary consumption Through an innovative analysis of environmental regulation the advocacy work of environmental health groups the expansion of the health food chain Whole Foods Market and interviews with consumers Norah MacKendrick ponders why the problem of toxics in the U S retail landscape has been left to individual shoppers and to mothers in particular She reveals how precautionary consumption or green shopping is a costly and time intensive practice one that is connected to cultural ideas of femininity and good motherhood but is also most available to upper and middle class households Better Safe Than Sorry powerfully argues that precautionary consumption places a heavy and unfair burden of labor on women and does little to advance environmental justice or mitigate risk
