Outsourcing State and Local Government Services John O'Looney, 1998 Should we be doing or trying to do everything ourselves or might it be better to contract some tasks out to others Could they do them better and cheaper than we can More and more state and local governments are asking these questions and while there are many answers on the Federal level these answers often don't apply lower down the line Nevertheless it is evident that contracting out is often the better strategy but how best to go about it What are the benefits and what are the hidden risks Dr O'Looney's book provides precisely the guidance that state and local managers need first

Outsourcing State and Local Government Services John O'Looney, 1998-11-19 Should we be doing or trying to do everything ourselves or might it be better to contract some tasks out to others Could they do them better and cheaper than we can More and more state and local governments are asking these questions and while there are many answers on the Federal level these answers often don't apply lower down the line Nevertheless it is evident that contracting out is often the better strategy but how best to go about it What are the benefits and what are the hidden risks Dr O'Looney's book provides precisely the guidance that state and local managers need first how to decide to outsource a government service then step by step how to proceed Based on extensive interviews and other research O'Looney takes managers through the intricacies of contract outsourcing and administration but in doing so he makes clear that he appreciates the importance of government His book is not an argument for privatization as so many other books are rather it is an affirmation of government and the benefits of its many services Readers will find theory and advice on the services that are most suitable for contracting out a listing and review of the components of a high quality analysis including the analysis of often overlooked political organizational and functional aspects of government advice on how to go from deciding to outsource to actually designing implementing and monitoring a contract in situations that could prove hazardous to the livelihoods of government workers He also discusses the changes that need to be made in the organizational culture management and employee training as a result of the change to a contract based system of providing services the considerations in designing work specifications and other critical aspects of the government vendor relationship and how ideal contracting processes and ideal contracts can differ according to the nature of the service being contracted The result is a thorough and highly practical volume for executives and managers in the public sector and for those who hope to do business with them

Toward Resilient Communities Christopher L. Atkinson,2013-11-12 In June 2011 the city of Minot North Dakota sustained the greatest flood in its history

Rather than buckling under the immense weight of the flood on a personal and community level government civic groups and citizens began to immediately assess and address the event s impacts Why did the disaster in Minot lead to government and community resilience whereas during Hurricane Katrina the non resilience of the government and community of New Orleans resulted in widespread devastation This book seeks to answer that question by examining how local government institutions affect pre and post disaster community and business resilience Utilizing both survey methods and interviews Atkinson analyzes the disasters that occurred in New Orleans Louisiana Palm Beach County Florida and Minot North Dakota He argues that institutional culture within local government impacts not only the immediate outcomes experienced during response but the long term prognosis of recovery for a community outside the walls of city hall Understanding tendencies within a community that lead to increased vulnerability of both individuals and businesses can lead to shifts in governmental community priorities and potentially to improved resilience in the face of hazard events Relevant to scholars of public administration disaster researchers and government officials this book contributes to a growing literature on community and business resilience It explores not just the devastation of natural disasters but profiles governmental impacts that led to responsive and able processes in the face of disaster
