This book examines whether or not and how personal religion associates with school cultural capital Specifically on one level the book offers insights and empirical data on who is choosing teaching and working in parochial schools and what motivates them to do so in the schools issues that still remain largely unexplored in the educational research literature In particular it centers on the significance of personal religion and commitment as a reason for choosing and serving in parochial schools On another level the book is an attempt to enhance our understanding of the leadership orientation school satisfaction teacher assertiveness and empowerment educational aspiration and parental involvement in parochial schools attributes reportedly essential for successful schools Most importantly at the heart of the book is an endeavor to estimate the influence of personal religion on the development of these cultural capital attributes and to address its implications for parochial schools as well as the current discussion on public schooling versus parochial schooling in the United States To achieve these goals the author will rely on first hand empirical data collected for this book or other related research projects and adopt various scientific methods for data analysis and interpretation The book shows that personal religion matters but its impact is weaker than thought and is largely restricted to the students and parents in parochial schools rather than their educators To the extent that parochial schools excel more than public schools personal religion seems to be responsible for the development of student and parent level cultural capital such as parenting style and student desire for academic success and favorable attitude toward school yet it does not necessarily engender the growth of teacher and administrator cultural capital This result to some extent comes as a surprise but corrects and enhances our understanding about whether or not and how religion affects academic achievement This book is an inquiry into the issue of school success and cultural capital representing a scholarly contribution to the fields of education religion psychology and sociology Both scholars and lay people of education and religion will find this book a useful informative and insightful reference and classroom textbook
