Race and Intelligence

Jefferson M. Fish, 2013-05-13 In recent years reported racial disparities in IQ scores have been the subject of raging debates in the behavioral and social sciences and education What can be made of these test results in the context of current scientific knowledge about human evolution and cognition Unfortunately discussion of these issues has tended to generate more heat than light Now the distinguished authors of this book offer powerful new illumination Representing a range of disciplines psychology anthropology biology economics history philosophy sociology and statistics the authors review the concept of race and then the concept of intelligence Presenting a wide range of findings they put the experience of the United States so frequently the only focus of attention in global perspective They also show that the human species has no races in the biological sense though cultures have a variety of folk concepts of race that there is no single form of intelligence and that formal education helps individuals to develop a variety of cognitive abilities Race and Intelligence offers the most comprehensive and definitive response thus far to claims of innate differences in intelligence among races

Refugees and

Migrants in Law and Policy Helmut Kury, Sławomir Redo, 2018-05-31 Refugees and migration are not a new story in the history of humankind but in the last few years against a backdrop of huge numbers of migrants especially from war-torn countries they have again been a topic of intensive and contentious discussion in politics the media and scientific publications Two United Nations framework declarations on the sustainable development goals and on refugees and migrants adopted in 2016 have prompted the editors who have a background in international criminology to invite 60 contributors from different countries to contribute their expertise on civic education aspects of the refugee and migrant crisis in the Global North and South Comprising 35 articles this book presents an overview of the interdisciplinary issues involved in irregular migration

around the world It is intended for educationists educators diplomats those working in mass media decision makers criminologists and other specialists faced with questions involving refugees and migrants as well as those interested in improving the prospects of orderly safe regular and responsible migration in the context of promoting peaceful and inclusive societies for sustainable development Rather than a timeline for migration policies based on now with states focusing on stopping migration now sending back migrants now or bringing in technicians or low skilled migrant workers now there should be a long term strategy for multicultural integration and economic assimilation This book prefaced by Fran ois Cr peau the United Nations Special Rapporteur on the human rights of migrants and William Lacy Swing Director General of the International Organization for Migration addresses the question of the rights and responsibilities involved in migration from the academic and practical perspectives of experts in the field of social sciences and welfare and charts the way forward to 2030 and beyond and also beyond the paradigm of political correctness
