Preventing A Biochemical Arms Race Stanford Security Studies:

Preventing a Biochemical Arms Race Alexander Kelle, Kathryn Nixdorff, Malcolm Dando, 2012-10-31 Preventing a Biochemical Arms Race responds to a growing concern that changes in the life sciences and the nature of warfare could lead to a resurgent interest in chemical and biological weapons CBW capabilities By bringing together a wide range of historical material and current literature in the field of CBW arms control the book reveals how these two disparate fields might be integrated to precipitate a biochemical arms race among major powers rogue states or even non state actors It seeks to raise awareness among policy practitioners the academic community and the media that such an arms race may be looming if developments are left unattended and to provide policy options on how it and its devastating consequences could be avoided After identifying weaknesses in the international regime structures revolving around the Biological Weapons and Chemical Weapons Conventions it provides policy proposals to deal with gaps and shortcomings in each prohibition regime individually and then addresses the widening gap between them

Absence in Science, Security and Policy Brian Balmer, Brian Rappert, 2016-02-06 This book explores the absent and missing in debates about science and security Through varied case studies including biological and chemical weapons control science journalism nanotechnology research and neuroethics the contributors explore how matters become absent ignored or forgotten and the implications for ethics policy and society The chapter Sensing Absence How to See What Isn't There in the Study of Science and Security is open access under a CC BY 4.0 license via link springer.com

WMD Arms Control

in the Middle East Harald Müller, 2016-02-17 The Middle East is a hot spot of proliferation. It contains one state assumed to possess nuclear weapons, several states that tried and failed to develop a military nuclear capability, one state under suspicion of trying to do so, and it is the world region that witnessed the most frequent and severe employment of chemical weapons since the end of World War I. Notwithstanding, not a single arms control regime concerning weapons of mass destruction (WMD) covers the region as a whole. Instead, we have seen several proliferation-related military operations which have rather contributed to destabilization than served non-proliferation. This volume, written under the auspices of the EU Consortium for Non-Proliferation and Disarmament, determines the current state of diplomatic efforts to establish a WMD-free zone in the Middle East. In doing so, it provides insights into central actors, conflicting political positions, thereby explaining the stalemate of efforts to negotiate a WMD-free zone. Chapters written by renowned experts from academia and policy-oriented think tanks, as well as by next-generation Middle East and arms control experts, introduce the subject to the reader, give background information about arms control initiatives, provide technical expertise, and endeavour to make proposals for arms control measures in support of the creation of a Middle East WMD-free zone.

America's Military Biomedical Complex Chief Justice Thomas J. Moyer, Professor for the Administration of Justice and Rule of Law and Professor of Public Health, Efthimios Parasidis, 2025 America's Military Biomedical Complex traces how laws and ethical codes have co-evolved with America's military science pursuits. It vividly illustrates how the drive for scientific and military superiority has led to transformational achievements in medicine and science, demonstrating how these endeavors have shifted the moral compass of government and society. Along with comprehensive historical analysis, the book introduces the concept of *jus in praeparatione bellum* (justice in war preparations) and recommends policies that balance national security priorities with fundamental principles of justice and human dignity.

The Art of Reverse Engineering Günther Friesinger, Jana Herwig, 2014-06-15 Reverse Engineering is a term that comes originally from the field of mechanical engineering. Reverse Engineering indicates the process of analysing an existing object or system by laying out its construction plan to then rebuild it in every detail. This manner of reconstruction allows for modifications and adjustments to new demands and requirements; it signifies creative appropriation, democratisation of knowledge, further development. The contributions in this volume take Reverse Engineering to another level, applying it to the fields of arts, sciences, and politics in an attempt to reveal the procedures of culture and technology at work and the importance of access to knowledge and skills in reshaping our present times and future.

Governance of Biotechnology in Post-Soviet Russia Tatyana Novossiolova, 2017-07-19 This book provides an up-to-date analysis of the governance of biotechnology in post-Soviet Russia. The rapid advancement of the life sciences over the past few decades promises to bring tremendous benefits but also raises significant social, ethical, legal, and security risks. Nations' adaptability to the twin challenges of attempting to secure the benefits while reducing the risks and threats is a large and still burgeoning governance challenge. Here, Novossiolova cuts across several sets of literature, bringing

together elements of the anthropological study of culture history of science and technology management and international governance and Soviet history and politics Due to its multidisciplinary approach in depth analysis accessible style and extensive reference list this text offers invaluable insights into the normative dimensions of the governance of biotechnology unpacking both the formal and intangible attributes and artefacts of biotechnology policy and practice in Russia

Neuroscience and the Future of Chemical-Biological Weapons Malcolm Dando, 2015-07-21 During the last century advances in the life sciences were used in the development of biological and chemical weapons in large scale state offensive programmes many of which targeted the nervous system This study questions whether the development of novel biological and chemical neuroweapons can be prevented as neuroscience progresses **Neuroscience and the Problem of Dual**

Use Malcolm R. Dando, 2020-08-20 This book discusses recent brain research and the potentially dangerous dual use applications of the findings of these research projects The book is divided into three sections Part I examines the rise in dual use concerns within various state s chemical and biological non proliferation regime s during this century as well as the rapid technologically driven advances in neuroscience and the associated possible misuse considerations in the same period Part II reviews the brain research projects in the EU USA Japan China and several other countries with regard to their objectives achievements and measures to deal with the problem of dual use Part III assesses the extent to which the results of this civil neuroscience work which is intended to be benign are being and could be protected against future hostile applications in the development of novel chemical and biological weapons *Bio-Imperialism* Gwen Shuni D'Arcangelis, 2020-12-18 Bio

Imperialism critiques an understudied dimension of the war on terror US focus on bioterror and germ threats The book examines the post 9 11 mobilization of bioscience and public health fields to this effort alongside narratives of Arab Muslim terror US vulnerability white femininity techno scientific progress and pandemic preparedness The book argues that the US significantly advanced its global control over biological medical and health resources during the war on terror
