**Debates for the Digital Age** Danielle Sarver Coombs, Simon Collister, 2015-11-23 By evaluating the Internet s impact on key cultural issues of the day this book provides a comprehensive overview of the seismic technological and cultural shifts the Internet has created in contemporary society Books about Internet culture usually focus on the people places sites and memes that constitute the cutting edge at the time the book is written That approach alas renders such volumes quickly obsolete This provocative work on the other hand focuses on overarching themes that will remain relevant for the long term The insights it shares will highlight the tremendous impact of the Internet on modern civilization and

individual lives well after specific players and sites have fallen out of favor Content is presented in two volumes The first emphasizes the positive impact of Internet culture for example 24 hour access to information music books merchandise employment opportunities and even romance The second discusses the Internet s darker consequences such as a demand for instant news that often pushes journalists to prioritize being first over being right online scams and invasions of privacy that can affect anyone who banks shops pays bills or posts online Readers of the set will clearly understand how the Internet has revolutionized communications and redefined human interaction coming away with a unique appreciation of the realities of today s digital world for better and for worse

Painting the Digital River James Faure Walker, 2006 This book is as much about painting as it is about the digital world But beyond both it s really about visual intelligence What makes it a joy to read is the lovely match between Faure Walker s subject and his style of writing apparently artless just making itself up as it goes along but actually always with a witty spring and never slack

MATTHEW COLLINGS artist critic author and television host As a painter himself James Faure Walker opens up a provocative dialogue between painting and digital computing that is essential reading for all painters interested in new technologies

IRVING SANDLER author critic and art historian Faure Walker has a distinguished background as both a painter and digital artist He is an early adopter of digital technology in this regard so has lived the history of the ever accelerating embrace of the digital On top of this he is a good storyteller and a clear writer who avoids the pitfalls of pretentious art world jargon

LANE HALL digital artist and professor Using a wide stream of fresh water as a metaphor Faure Walker depicts a flow of ideas concepts and solutions that result in digital art All the core elements of an art style in making are here ties with mainstream and traditional art stages of technological progress and reflections on the bright and varied personalities of digital artists With a personal approach Faure Walker presents vibrant exciting emotionally overpowering art works and describes them with empathy and imagination This entertaining sensitive and observant book itself flows like a river

ANNA URSYN digital artist and professor Something like this book is overdue I am not aware of any comparable work Lots of how to do but nothing raising so many interesting and critical questions

HANS DEHLINGER digital artist and professor Here is the intimate narrative of a passionate yet skeptical explorer who unflinchingly records his artistic discoveries and personal reflections Faure Walker s decades of experience as a practicing painter art critic and educator shine through on every page The book is an essential resource for anyone interested in digital visual culture

ANNE MORGAN SPALTER digital artist author and visual computing researcher This book is about art written from an artist s point of view It also is about computers written from the perspective of a painter who uses them

Painting the Digital River is James Faure Walker s personal odyssey from the traditional art scene to fresh horizons from hand to digital painting and sometimes back again It is a literate and witty attempt to make sense of the introduction of computer tools into the creation of art to understand the issues and the fuss to appreciate the people involved and the work they produce to know the promise of the new media as well as the risks Following his own winding path Faure

Walker tells of learning to paint with the computer of misunderstandings across the art and science divide of software limitations of conversations between the mainstream and digital art worlds of emerging genres of digital painting of the medieval digital of a different role for drawing As a painter and computer enthusiast the author recognizes the marvels of digital paint as well as anyone But he also challenges the assumption that digital somehow means different The questions he raises matter to artists of every background style and disposition and the answers should reward anyone seeking insight into contemporary art

A Cognitive and Anthropological Response to the 'Death' of Painting Bruce Rimell, 2016-04-07 The alleged death of painting has shaped the recent course of art but the model of the human mind upon which it rests is no longer considered accurate Cognitive science has shown that the mind is not a blank slate but content rich and as such humans bear an array of innate expectations of reality and non reality which apply to painting as well as other human behaviours such as religion or music This creative thesis takes in a series of case studies tracing the prehistory of painting in light of these cognitive propensities from the beginnings of human culture to Bushman rock art and the experiences of painters today to uncover a perennial function for painting which cannot die the ubiquitous sensation of an otherworld beyond the canvas or rock face This approach to painting demands its rehabilitation as a humanising self expression in a world increasingly estranged from art abandoning artistic ideology in favour of an image based communion with human nature

Digital Privacy Jan Camenisch, Ronald Leenes, Dieter Sommer, 2011-04-18 This book covers the outcome of a four year European Community FP VI PRIME Project on privacy enhancing identity management techniques and systems supporting the sovereignty of users over their private sphere and enterprises privacy compliant data processing
