Climate Change Litigation in the Asia Pacific Jolene Lin, Douglas A. Kysar, 2020-10-29 This is the first scholarly examination of climate change litigation in the Asia Pacific region Bringing legal academics and lawyers from the Global South and Global North together this book provides rich insights into how litigation can galvanize climate action in countries including Pakistan Indonesia Malaysia and China Written in clear and accessible language the fourteen chapters in this book shed light on the important question of how litigation may unfold as a potential regulatory pathway towards decarbonization in the world's most populous region

Just Security in an Undergoverned World William J. Durch, Joris Larik, Richard Ponzio, 2018 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and

freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War Two to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in institutions This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to vexing issues that transcend borders and capacities of individual actors from conflict and climate change to poverty and pandemic disease The volume offers just security as a new framework for evaluating innovative solutions and strategies for institutional reform
