Outdoor Lighting Physics Vision And Perception:

Outdoor Lighting: Physics, Vision and Perception Duco Schreuder, 2008-08-15 The present book is based on the experience of the author The experience is mainly the result of years of research of consulting work and in participation in policy decision making in many fields most but not all related to outdoor lighting To some degree the book represents the preference of the author The selection of the subjects is based on more than 50 years of experience of what is desirable to know for persons engaged in scientific research or practical application in the fields of lighting and vision The subjects deal with a number of fundamental aspects The theorists must have them at their fingertips whereas the practical engineers may assume them as known in their daily work The selection of subjects is based in part by the questions that came to the author over the years but even more by the preference of the author himself In this respect it is a personal book Thus it should be stressed that the book is not a handbook or even a textbook many subjects that commonly are treated in such books are not included here Not because they lack importance but because the author feels that they are adequately treated elsewhere Some relevant works are mentioned in the References Over the years the author has been engaged in giving courses on vision and lighting lately more in particular on Masterclasses on a post graduate or post doctorate level [Vision and Visual Perception](#) Duco A. Schreuder, 2014-12-03 Vision is about insight and visual perception is about cognition and they form the foundation of how we see the world Duco A Schreuder a physicist and psychologist explores the finer details of each in this groundbreaking book that explores human consciousness and perception Sharing virtually everything he's learned over a varied career spanning more than sixty years he examines a wide array of topics including how we understand what we visually process how we store and retrieve information the role that neurons play in how what we see and much more While Schreuder isn't afraid to disagree with other leading thinkers he relies on science and focuses on the facts behind it so you can understand lighting visual perception engineering design and applied and experimental physics Looking is about insight whereas seeing is about knowledge and you need to know how each one works to truly understand how humanity views the world Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline you'll be well served by taking a closer look at Vision and Visual Perception [Visible Light Communications](#) Zabih Ghassemlooy, Luis Nero Alves, Stanislav Zvanovec, Mohammad-Ali Khalighi, 2017-06-26 Visible Light Communications written by leading researchers provides a comprehensive overview of theory stimulation design implementation and applications The book is divided into two parts the first devoted to the underlying theoretical concepts of the VLC and the second part covers VLC applications Visible Light Communications is an emerging topic with multiple functionalities including data communication indoor localization 5G wireless communication networks security and small cell optimization This concise book will be of valuable interest from beginners to researchers in the field [The Human and Social Dimension of Urban Lightscapes](#) Daria Casciani, 2020-11-02 This book explores new criteria and characteristics for

Zum Einfluss des Spektrums auf die Blendung Niedling,

Matthias,2019-05-07 In der vorliegenden Arbeit wurde der Einfluss der spektralen Verteilung von Blendquellen auf die physiologische und die psychologische Blendung untersucht Erstere wurde dabei ber die Kontrastwahrnehmung operationalisiert letztere ber die Bewertung der Blendung auf einer neunstufigen Skala Das Ziel der im Rahmen dieser Arbeit durchgef hrten Untersuchungen war es eine physiologische Erkl rung f r eine erh hte Blendempfindlichkeit bei erh htem Anteil kurzweilliger Strahlung im Spektrum der Blendquelle zu finden Ferner sollte gepr ft werden ob eine additiv zusammengesetzte spektrale Blendempfindlichkeitskurve zur Vorhersage der Blendung durch reale breitbandige Blendreize geeignet ist Um dies zu untersuchen wurden verschiedene Probandenversuche im Labor durchgef hrt Hierf r wurde ein Versuchsdesign entwickelt in welchem unter sonst konstanten Bedingungen das Spektrum einer Blendquelle frei einstellbar war Dabei wurde der Anwendungsfall einer Stra enbeleuchtungsszene nachgestellt Die Untersuchungen fanden unter mesopischen Adaptationsbedingungen statt In den Untersuchungen wurden sowohl schmalbandige als auch breitbandige Blendreize gezeigt Letztere wurden dabei in synthetische Spektren zur gezielten Stimulation retinaler Photorezeptoren und in reale Spektren unterteilt Zudem wurde berpr ft ob der Pupillendurchmesser vom Spektrum der Blendquelle beeinflusst wird Die Blendungsbewertung breitbandiger Blendspektren zeigte eine signifikante Abh ngigkeit von der spektralen Verteilung der Blendquelle In Abh ngigkeit der Stimulation der S Zapfen wurde eine maximale Erh hung von 1 4 Skaleneinheiten auf der verwendeten Skala festgestellt Die Blendungsbewertung der schmalbandigen Blendreize st tzt diesen Befund unter Ber cksichtigung der Hornhautbeleuchtungsst rke Die aufgezeichnete spektrale Blendempfindlichkeitskurve eignete sich nicht zur Vorhersage der Blendungsbewertung breitbandiger Reize F r die nderung des Pupillendurchmessers wurde keine spektrale Abh ngigkeit festgestellt Die Kontrastwahrnehmung zeigte ebenfalls keine relevante Abh ngigkeit vom Spektrum der Blendquelle Die Ergebnisse wurden f r variierende Umfeldspektren best tigt Dabei zeigte sich dass f r Blendquellen au erhalb der Fovea anscheinend mesopische Leuchtdichten zur Beschreibung des Adaptationsniveaus verwendet werden sollten Die Befunde dieser Arbeit wurden in einen bestehenden Ansatz zur Bewertung der psychologischen Blendung integriert This thesis deals with the influence of glare sources spectral power distribution SPD

on disability and discomfort glare While disability glare was measured by contrast threshold discomfort glare was operationalized by the glare rating on a nine pointscale The aim of the studies in this work was to find a physiological explanation for increased glare perception with an increasing amount of short wavelenght radiance Furthermore it was investigated whether an additive composed spectral glare sensitivity of narrow band stimuli is applicable for the prediction on discomfort glare of broadband stimuli To investigate this issue different investigations were carried out under laboratory conditions For this purpose a setup with spectral free adjustable glare source was developed The investigations were performed under street lighting and therefore under mesopic conditions Broadband and narrow band stimuli were presented to the subjects The broadband stimuli were separated in synthetic spectra for the specific stimulation of different photoreceptors and realisic spectra and synthetic spectra to confirm the results Moreover the influence of the glare sources SPD on pupil diameter was investigated The glare sources SPD of broadband stimuli showed a significant influence on glare evaluation Depending on the stimulation of the s cones glare rating increased up to 1 4 scale points on the used scale The glare rating of the narrow band stimuli confirms this result in consideration of the illuminance at the subject s eye The spectral glare sensitivity curve figured out in this research was not applicable to predict discomfort glare of broadband stimuli The glare sources SPD showed no influence on pupil diameter Also the contrast threshold was not affected by the SPD The results were confirmed for different spectral surrounding conditions In order to figure this out it was evaluated that for glare sources presented outside the fovea mesopic luminances should be apparently used as adaptation luminance The results of this work were integrated in an existing glare evaluation model
