Prentice Hall The Ancient World:

World Studies: the Ancient World Heidi Hayes Jacobs, Michal L. LeVasseur, 2004-03 *The Ancient World* Sarolta Anna Takacs, Eric H. Cline, 2015-07-17 Designed to meet the curriculum needs of students from grades 7-12 this five volume encyclopedia explores the history and civilizations of the ancient world from prehistory to approximately 1000 CE. Organized alphabetically within geographical volumes on Africa, Europe, the Americas, Southwest Asia, and Asia and the Pacific, entries cover the social, political, scientific, and technological, economic, and cultural events and developments that shaped the ancient world in all areas of the globe. Each volume explores significant civilizations, personalities, cultural and social developments, and scientific achievements in its geographical area. Boxed features include Link in Time, Link in Place, Ancient Weapons, Turning Points, and Great Lives. Each volume also includes maps, timelines, and illustrations, and a glossary, bibliography, and indexes complete the set. *From Polis to Empire--The Ancient World, c. 800 B.C. - A.D. 500* Andrew G. Traver, 2001-09-30 Covering the very beginnings of Western civilization, this biographical dictionary introduces readers to the great cultural figures of the ancient world, including those who contributed significantly to architecture, astronomy, history, literature, mathematics, philosophy, painting, sculpture, and theology. While focusing on great cultural figures of the Mediterranean basin, such as Homer, Sophocles, and Aristophanes, the volume also includes those who impinged on Greco-Roman Civilization, such as Hannibal Barca and King Darius of Persia. Showing how the era's intellectual milieu was interwoven with its political agenda, the book also includes entries on major political and military figures, pointing to their cultural as well as their political contributions. With 480 entries, the book is an excellent basic reference for students seeking an understanding of the ancient world. Going from polis to empire, the years from 800 BC to AD 500 include the archaic period of the eastern Mediterranean, the Greek classical period, the Persian and Peloponnesian Wars, and Rome's evolution from a republic to an empire dominating the entire Western world. A Jewish carpenter living at the edge of the Roman Empire preached a message with profound implications for the Roman State and Western religion. Providing a quick and easy reference to people who lived in this world, this book profiles the men and women who contributed to the development, growth, and culture of Western civilization. Most of the subjects were native to the Mediterranean basin, including Asia Minor, Greece, Italy, southern Gaul, Spain, North Africa, and Phoenicia, but the book also includes important Persians, Celts, Germanic peoples, and Huns. The book provides valuable background information for anyone interested in the birth of Western culture. The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt, and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that there is no record of any important Jewish contribution to the sciences? World Civilizations, Thomson Wadsworth. Or that Christianity was started by a young Palestinian named Jesus?

The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all

Soldiers' Lives through History - The Ancient World Richard A. Gabriel, 2006-11-30 Once warfare became established in ancient civilizations it's hard to find any other social institution that developed as quickly In less than a thousand years humans brought forth the sword sling dagger mace bronze and copper weapons and fortified towns The next thousand years saw the emergence of iron weapons the chariot the standing professional army military academies general staffs military training permanent arms industries written texts on tactics military procurement logistics systems conscription and military pay By 2 000 B C E war was an important institution in almost all major cultures of the world This book shows readers how soldiers were recruited outfitted how they fought and how they were cared for when injured or when they died It covers soldiers in major civilizations from about 4000 B C E to about 450 C E Topics are discussed cross culturally drawing examples from several of the cultures armies and time periods within each chapter in order to provide the reader with as comprehensive an understanding as possible and to avoid the usual Western centric perspective too common in analyses of ancient warfare
