Principles and Practice of Geriatric Surgery Ronnie Ann Rosenthal, Michael E. Zenilman, Mark R. Katlic, 2013-06-29

More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate

Surgical Management of Elderly Patients Antonio Crucitti, 2018-05-08 This volume offers a comprehensive and up to date overview of the major surgical procedures performed on elderly patients With advancing age the conditions that require surgery normally increase in incidence and today all surgeons around the globe can be considered geriatric surgeons The latest anesthesiological

procedures the technical improvements and an increased medical knowledge of the comorbidities impact have brought extraordinary advances in this field but this should not allow us to forget that a careful assessment of elderly patients is necessary before undertaking surgery since also the simplest surgical procedures could alter the delicate psychophysical equilibrium of these frail patients Introduced by a demographic panorama and analysis the book describes the anesthesiological management the preoperative assessment and preparation the perioperative care and hemostasis control connected with the main surgical pathologies gastrointestinal endocrine neoplastic vascular and hepato biliary as well with traumatic and non traumatic emergencies It will be an invaluable easy to use resource for clinicians researchers and trainees alike

Geriatric Medicine Christine K. Cassel, Rosanne Leipzig, Harvey Jay Cohen, Eric B. Larson, Diane E. Meier, 2006-05-29

Since the publication of the third edition of Geriatric Medicine extraordinary advances have occurred in the science of aging and the potential for biomedical research to give us answers to many if not most of the age related disorders that threaten the quality of life in older years At the most basic level the successful mapping of the human genome was declared complete in the fall of 2000 Understanding the map of the human genome is as important as understanding the map of genomes of important laboratory species ranging from the microscopic worms and fruit flies used in most classic genetic studies to rodents such as laboratory mice and eventually to primates on which much of the research on the aging human brain is done The genetic maps of all of these species including our own does not answer clinical questions but it does open the door to dramatic rapid and efficient answers to questions about the genetic polymorphisms related to diseases in humans The telomerase story also unfolded since the third edition Telomerase is an enzyme responsible for maintaining the telomeres the redundant DNA portions at the end of chromosomes whose shortening seems to be linked directly to cell senescence apoptosis and the control over cell death which at the level of the individual cell seems to be linked to the decline of organ function and eventually aging and death within the organism

Cardiothoracic Surgery in the Elderly Mark R. Katlic, 2011-05-04

Cardiothoracic Surgery in the Elderly Evidence Based Practice is an important and timely book that reflects the thoughtful work of pioneers in geriatric surgery It encompasses their knowledge related to geriatric surgery and their reflections and guidance on the rapidly accumulating knowledge related to improving the health and surgical care of seniors This book provides a scholarly review of the constantly expanding knowledge base about cardiovascular and thoracic surgery in seniors The book follows a logical sequence covering general aspects of care cardiac surgery and thoracic surgery Chapters are focused on common devastating and often missed complications of surgical care in the seniors These include delirium depression pressure sores functional losses incontinence volume depletion and asymptomatic or atypical complications myocardial infarction post operative diarrhea urinary tract infections and pneumonia Each is expertly reviewed Strategies to help the surgeons and the surgical team anticipate recognize and effectively prevent or manage such problems are discussed and the evidence basis for such strategies is provided Cardiothoracic Surgery in the Elderly Evidence

Based Practice is particularly timely and the first to review the substantial body of knowledge that has been developed in recent years related to geriatric cardiothoracic surgical problems. It catalogs well the expanding knowledge basis for achieving successful surgical outcomes in the very old. It provides a most useful resource for cardiovascular thoracic surgeons in training and those already in practice. **Physiological Basis of Aging and Geriatrics** Paola S.

Timiras, 2007-08-16 Extensively revised and updated to reflect the current state of knowledge in the study of aging this Fourth Edition offers a complete profile of the aging process at all levels from molecules and cells to demography and evolution. Written by international experts in current basic and clinical aging research, this text includes aspects of individual comparative and differential aging and discussions of theories and mechanisms of aging. This invaluable reference illustrates how bodily systems, organs, and functions are affected with aging, describes how genetic and environmental factors influence age-related changes, and addresses some of the clinical consequences of these changes for health and longevity. Well illustrated with numerous tables and graphs, this book presents up-to-date information from internationally renowned experts in various biomedical fields. **Practical Guide to Moderate Sedation/Analgesia** Jan Odom-Forren, Donna S.

Watson, 2005-03-09 This easy-to-follow book is your complete clinical guide to caring for patients receiving conscious sedation/analgesia during a short-term therapeutic, diagnostic, or surgical procedure. It covers everything you need to know from practice guidelines for administering sedation to pre-sedation requirements, intra-procedure monitoring, and documentation and discharge criteria. **BOOK JACKET** Surgical Decision Making in Geriatrics Rifat Latifi, 2020-08-12 This book is designed to present a comprehensive and state-of-the-art approach to all aspects of geriatric surgery within the broad confines of surgery in geriatrics, including general surgery, neurosurgery, thoracic surgery, vascular surgery, cardiac surgery, surgical oncology, hepatobiliary and transplant surgery, plastic, colorectal, orthopedic, gynecologic, and urologic surgery. The text is split into four parts. The first part is organized under general considerations on the geriatric surgical patient and includes current trends in geriatric surgery and a number of important general issues such as practical approaches to reversal of bleeding, anticoagulation, role of anesthetic concerns in advanced age, frailty index, and measurements of physiological reserves, nutritional support in the elderly, quality of life in the elderly, drug use, and family involvement. Part two of the book focuses on surgery-specific system-based problems in geriatric surgical patients. The third part addresses many other important aspects of geriatric surgery, including palliative and end-of-life care for the elderly, religious issues, and the elderly care surgery, elderly with mental health issues, and nursing care of elderly patients. The fourth and final part describes the need for geriatric surgical care, education, and the components that are essential for the curriculum of current and future generations of students. Written by experts in the field, Surgical Decision Making in Geriatrics addresses patient selection, pre-operative considerations, technical conduct of the most common operations, and avoiding complications. **Surgical Oncology Manual** Frances C. Wright, Jaime M. Escallon, Moises Cukier, Melanie E. Tsang, Usmaan Hameed, 2020-08-27 This

third edition manual provides a comprehensive insightful evidenced based review of general surgical oncology and serves as a valuable resource for general surgeons in training practicing general surgeons and surgical oncologists The volume describes a multidisciplinary approach that integrates clinical radiologic and pathologic data in formulating practical clinical management and offers a practical approach to the most common situations when treating cancer patients Each chapter focuses on an individual malignancy and describes the presentation of the malignancy integrated management based on stage landmark trials and suggestions for who to discuss at multidisciplinary cancer conferences Multiple tables in each chapter provide a concise yet comprehensive summary of the current status of the field Clinical pearls or tips and tricks from high volume surgeons at the University of Toronto are also discussed The third edition of the Surgical Oncology Manual will serve as a critical resource for general surgeons in training and practicing surgeons dealing with this challenging field

Emergency General Surgery in Geriatrics Rifat Latifi, Fausto Catena, Federico Coccolini, 2021-03-29 There is a growing need for a book on emergency general surgery in the elderly as adults age 65 and older are the fastest growing segment of the population worldwide and their number is expected to double to 89 million between now and 2050 Based on these changing demographics it is expected that there will be a concurrent rise in the demand for a variety of surgical services including vascular surgery with a projected growth of 31% and general surgery with a projected growth of 18% as well as in all sub disciplines of surgery thoracic cardiac oncology hepatobiliary transplant plastic colorectal orthopedic gynecologic urology and neurosurgery In addition older surgical patients often require a different level of care than younger patients during the preoperative intraoperative and postoperative phases Many of our geriatric population have multiple chronic illnesses beyond the one for which surgery is required and therefore are prone to developing postoperative complications functional decline loss of independence and other undesirable outcomes In response this book offers surgeons geriatrists and nurses state of the art surgical approaches and essential information on the complex perioperative care of the elderly
