

4 Research methods for sport and exercise sciences

Why do we play sport? How does a good player become an elite player? How useful is exercise in combating childhood obesity? Research is vital to understanding all aspects of sport, exercise and health and it is only through research that questions such as these can be answered. Sport and exercise scientists are playing an ever more significant role within society, often leading the way with developments in sport performance and health sciences. However, to stay at the forefront of applied work and provide the highest quality of service to clients, you need to base your advice on a sound knowledge base. This can only be developed through high quality research.

Throughout this unit, you will develop a knowledge and understanding of some of the key issues that are associated with research methods. This will range from examining some different quality indicators such as validity and reliability, to looking at how you can make sure that you are meeting the necessary professional standards associated with research in sport and exercise sciences. After this, you will do more applied work examining how you can structure and organise research, and look at the different ways that you can collect and analyse data using both qualitative and quantitative methods.

Learning outcomes

After completing this unit you should:

1. know key issues in research methods for the sport and exercise sciences
2. know data collection techniques for the sport and exercise sciences
3. know qualitative data analysis techniques for the sport and exercise sciences
4. know quantitative data analysis techniques for the sport and exercise sciences.
