Digital Government at Work Ian McLoughlin,Rob Wilson,2013-07-04 Over the past decade putting public services on line has been a focus of huge policy and financial investments aimed at providing more joined up service delivery For some this is part of a transformation that is bringing about a new era of integrated digital government For others digitalization means threats to privacy and security and a strengthening of bureaucracy In the UK and beyond front line service providers and citizens have been slow to take up digital services whilst major projects have floundered This book takes a fresh look at this vital area for public policy and practice Informed by over ten years of original research on the inside of projects to put

local services on line the authors combine cross disciplinary insights to provide a new social informatics perspective on digital government Experiences in areas such as health and social care are used to illustrate the dangers of over integration when key decisions are left to system designers as they seek to integrate information in centralized systems The authors argue for a new architectural discourse to change the way that systems are deployed evolve and are governed This leads to the conclusion that increased coordination of public services in a digital economy is better achieved through federated rather than integrated services that recognize the infrastructural nature of information systems and the essential role of co production in their future evolution
