Reading Projects Reimagined Student Driven Conferences To Deepen Critical Thinking:

Reading Projects Reimagined Daniel H. Feigelson, 2014-10-16 Veteran teacher and author Dan Feigelson raises an important question about the larger goal of reading instruction while it is our job as reading teachers to introduce students to new ideas and comprehension strategies shouldn't we also teach them to come up with their own ideas without teacher prompting In *Reading Projects Reimagined* Feigelson shows us how conference based individual reading projects help students learn how to think for themselves He provides a concrete picture of what reading projects look and sound like in the classroom with step by step guidelines on how to conduct a productive conference categories to help teachers narrow down possible directions a conference could go examples of student work and teacher student dialogue When readers go beyond simple comprehension questions to extend their own ideas they're on their way to becoming independent critical thinkers who can read any text with depth and thoughtfulness Praise for *Reading Projects Reimagined* Dan Feigelson is one of our shrewdest and most versatile thinkers in the field of literacy a guy who can draw from his experiences as classroom teacher staff developer principal and superintendent In this fascinating book Dan gives a new vision for the reading conference in which teachers can help students name their own ideas and use them as tools for deeper comprehension Ralph Fletcher This book contains some of the best writing about conferring with children that I've read Carl Anderson If you have ever wondered how to bring more substance more gravitas to reading conferences this book will provide you with an array of possibilities Dan Feigelson is absolutely clear that he is not offering a set of scripts for conferences instead he shows us how to help each child develop a sense of the possible Ellin Keene In *Reading Projects Reimagined* Dan Feigelson reminds us of a radical and grounding premise that a truly effective reading conference one that can change a reading life prioritizes the reader not the standards or test prep Dan shows us how to shine a light on children's words and intentions in ways that can increase their engagement with texts and inspire investment in their own text based ideas Kathy Collins *Fixing Instruction* Victor P. Maiorana, 2015-10-21 A professional core includes a common language of practice foundation principles and skills and related standards Such a core is present in the medical engineering and legal professions Instructionally it is not present in the teaching profession There is no core foundation for critical instruction Such instruction long sought but unrealized leads students to think read and write critically for content comprehension These issues obstruct critical instruction There is no uniform use of instructional terms Conventional serialism based instruction blocks the mind's nature to think critically Rote learning is the result Teaching is based on thinking directed at subject matter Yet we practice without a universal foundation in either Teacher preparation programs have no foundation courses for critical instruction There are no teacher educator teacher or student standards for critical thinking for comprehension the basis of critical reading and writing These issues result in weak instructional preparation and practice and poor student achievement *Fixing Instruction* resolves the issues It provides for the first time teacher educators teacher candidates teachers and professional developers

Practical Punctuation Daniel H. Feigelson, 2008 Dan has made it his business to delve into punctuation and we are all the wiser for the impressive and exciting writing about the subject that he has done in this book Carl Anderson Author of *How's It Going and Assessing Writers* In all the books I've read about written language Dan's is the first to explore the mind's ear He has actually changed the way I read as well as write How lucky we are to finally have an intellectually engaging exploration of what we have too long considered drudgery When you consider Dan's approach you'll wonder how you ever taught another way

Development of critical thinking through collaborative learning and conference-like courses among third and fourth year secondary students Carolina Mardones

Vallejos, Universidad de Concepción (Chile). Facultad de Educación, 2012 Teaching Critical Thinking Laura Billings, Terry Roberts, 2014-01-09 Help students meet today's literacy demands with this new book from Terry Roberts and Laura Billings. The authors show how a seminar approach can lead students deeper into a text and improve their speaking, listening, and writing skills as recommended by the Common Core State Standards. Roberts and Billings provide easy-to-follow information on implementing Paideia Seminars in which students discuss a text and ask open-ended questions about it. When teachers use this lesson format, students are exposed to a wide range of increasingly complex texts. They also learn how to collaborate, talk about, and reflect on what they're reading to make meaning independently and together. Seminars can be done in English class and across the curriculum using social studies documents or math problems as the texts under discussion. Teaching Critical Thinking also offers an array of practical resources: teacher lesson plans, student samples, a list of possible ideas and values for discussion, a guide to asking good questions during a seminar, six full seminar plans including the texts covering literature, social studies, and science topics.
