

Band Spread Dial This is the "fine tuning" dial scale. It is accurate only when the **MAIN TUNING** control is used to set the dial pointer directly over one of the red Band Spread calibration points. See **Band Spread** and **Dial Calibration**. **BAND SPREAD** moves this dial.

Speaker Insert the Speaker plug into the SPK jack on the back of the Receiver. Unless you have Phones connected, you will hear the sounds through the Speaker.

MODE Determines the proper mode of detection for the Receiver. For normal voice signals, use the AM (amplitude modulation) position. For Code and Single Side Band signals, use the SSB/CW (single side band "continuous wave" or code) position. The SSB/CW position provides the necessary beat frequency tone for receiving Single Side Band and Code signals. Use this position in conjunction with **BFO PITCH** control.

ANL The Automatic Noise Limiter switch helps to cut out annoying man-made and other types of interfering noise. When noise is a problem, set to ON; for normal listening, use the OFF position.

PHONES Plug any communications-type 8,000 ohm headphones into this jack for private listening. Headphones provide for more precise listening, especially in areas where background noise is a problem. They also make it easier to hear some of those hard-to-hear DX signals. When a plug is inserted, the Speaker sound is automatically disconnected.

Main Tuning Dial Shows the frequency you are tuned to. Special radio services or bands of frequencies are indicated on each band. The white and red marks are calibration marks for Band Spread calibration.

BAND SPREAD Provides fine tuning for any of the bands of operation. It turns the Band Spread Dial.

BFO PITCH Beat Frequency Oscillator Pitch Control is for adjusting the tone of a code signal or to achieve proper voice sound of a Single Side Band signal. It functions only when **MODE** is in the CW/SSB position.

ANT TRIM Antenna Trimmer Control peaks the incoming signal for optimum reception. Set it to provide maximum S-Meter reading—you may have to reset each time you make major **MAIN TUNING** changes.

AF GAIN Is the Volume and power control. Turn clockwise to turn power on and increase volume. Turn maximum counterclockwise to turn power OFF.
