Vanclay**

Realizing Community Futures A Practical Guide To Harnessing Natural Resources Fergus Sinclair:

Realizing Community Futures Ravi Prabhu, Fergus Sinclair, Jerry Vanclay, 2012-05-04 This revolutionary book is a practical guide for helping communities in any location or context from a fishing community in England to a logging town in Canada to a farming village in India to develop a collective vision of a prosperous and sustainable future and a road map for mobilizing and managing their natural resources to realize that future It explains in a step by step manner how to use a process of participatory modelling to structure people's learning their understanding of the natural systems they depend upon and how this can lead to better social and environmental outcomes The book is for communities and professional natural resources managers who want to use this powerful tool to help people share visions of the future they want and to take appropriate immediate action to turn them into reality It introduces both the theory and practice of participatory modelling using everyday language and a variety of accessible and successful examples The result is a practical useful and accessible guide for practicing real successful community based natural resource management anywhere in any circumstances for community prosperity

Adaptive Collaborative Management in Forest Landscapes Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond utilising detailed studies of forest landscapes and communities Many forest management proposals are based on top down strategies such as the Million Tree Initiatives Forest Landscape Restoration FLR and REDD often neglecting local communities In the context of the climate crisis it is imperative that local peoples and communities are an integral part of all decisions relating to resource management Rather than being seen as beneficiaries or people to be safeguarded they should be seen as full partners and Adaptive Collaborative Management is an approach which prioritizes the rights and roles of communities alongside the need to address the environmental crisis The volume presents detailed case studies and real life examples from across the globe promoting and prioritizing the voices of women and scholars and practitioners from the Global South who are often under represented Providing concrete examples of ways that a bottom up approach can function to enhance development sustainably via its practitioners and far beyond the locale in which they initially worked this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasize local control inclusiveness and local creativity in management This book will be of great interest to students scholars and practitioners working in the fields of conservation forest management community development and natural resource management and development studies more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

[Responding to Environmental Issues through Adaptive Collaborative Management](#) Carol J. Pierce Colfer, Ravi Prabhu, 2023-03-15 Focused on forest management and governance this book examines two decades of experience with Adaptive Collaborative Management ACM assessing both its uses and

improvements needed to address global environmental issues The volume argues that the activation and the empowerment of local peoples are critical to addressing current environmental challenges and that this must be enhanced by linking and extending such stewardship to global and national policymakers and actors on a broader scale This can be achieved by employing ACM s participatory approach characterized by conscious efforts among stakeholders to communicate collaborate negotiate and seek out opportunities to learn collectively about the impacts of their action The case studies presented here reflect decades of experience working with forest communities in three Indonesian Islands and four African countries Researchers and practitioners who participated in CIFOR s early ACM work had the rare opportunity to return to their research sites decades later to see what has happened These authors reflect critically on their own experience and local site conditions to glean insights that guide us in more effectively addressing climate change and other forest related challenges They showcase how global and regional actors will have to work more closely with smallholders Indigenous Peoples and local communities recognizing the key local roles in forest stewardship This book will be of great interest to students scholars and practitioners working in the fields of conservation forest management community development natural resource management and development studies more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Unasylva*, 2006
