Reason And Action Philosophical Studies Series:

Reason and Action Bruce Aune, 1977-09-30 Philosophers writing on the subject of human action have found it tempting to introduce their subject by raising Wittgenstein's question What is left over if you subtract the fact that my arm goes up from the fact that I raise my arm The presumption is that something of particular interest is involved in an action of raising an arm that is not present in a mere bodily movement and the philosopher's task is to specify just what this is Unfortunately such an approach does not take us very far since a person could properly be said to raise his or her arm while asleep or hypnotized even though he or she would not be performing an action in the sense of action with which philosophers are particularly concerned To avoid this kind of difficulty I shall approach the subject of human action in a more academic way I shall expound some important rival theories of human action and introduce the relevant issues by commenting critically on those theories One of the issues I eventually introduce is a metaphysical one A theory of action makes sense I contend only on the assumption that there are such things as actions or events After considering some key arguments bearing on the issue I conclude that as matters currently stand in philosophy a metaphysically noncommittal attitude toward actions and events seems justified

Rationality and the Good Mark Timmons, John Greco, Alfred R. Mele, 2007-09-28 Rationality and the Good includes thirteen new essays on the work of the noted philosopher Robert Audi by Fred Adams William P. Alston Laurence Bonjour Roger Crisp Elizabeth Fricker Bernard Gert Thomas Hurka Al Mele Hugh McCann Walter Sinnott-Armstrong Raimo Tuomela Candace Vogler and Timothy Williamson Audi is represented himself in Part III where he replies to his critics and advances significant new arguments

Rationality, Time, and Self Olley (F.O.C.H.) Pearson, 2018-02-16 This book provides a new argument for the tensed theory of time and emergentism about the self This argument derives in part from theories which establish our nature as rational and emotional beings whose behavior is responsive to reasons which are facts It is argued that there must be reasons hence facts that can only be captured by tensed and or first personal language if our behavior is to be by and large rational and appropriate This establishes the tensed theory of time and emergentism or dualism about the self given the physical body can plausibly be fully described non first personally In the course of this discussion the book also clarifies and defends a notion of fact and responds to McTaggart's paradox and Wittgenstein's private language argument

The Philosophy of Social Practices Raimo Tuomela, 2002-10-24 This is a systematic philosophical and conceptual study of the notion of a social practice Raimo Tuomela explains social practices in terms of the interlocking mental states of the agents he shows how social practices for example customs and traditions are building blocks of society and he offers a clear and powerful account of the way in which social institutions are constructed from these building blocks as established interconnected sets of social practices with a special new social status His analysis is based on the novel concept of shared we attitudes which represent a weak form of collective intentionality and he makes instructive connections to major topics

and figures in philosophy and the social sciences His book will be of interest to a wide range of readers in philosophy of mind philosophy of social science psychology and sociology and artificial intelligence A Companion to the Philosophy of Action Timothy O'Connor, Constantine Sandis, 2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks *Conversations on Human Action and Practical Rationality* Susana Cadilha, Carlos Mauro, Sofia

Miguens, 2013-07-16 This volume brings together leading scholars in the study of practical rationality and human action namely Alfred Mele Hugh McCann Michael Bratman George Ainslie Daniel Hausman and Joshua Knobe They were interviewed by the editors in a project based at the Institute of Philosophy of the University of Porto structured around the questions 1 In your view what are the most central or important problems in the philosophy of action 2 For some or all of the following action agency agent what do they contrast with most significantly 3 Which of these are liable to be rational irrational 4 In what sense is the thing to do to be decided by what is rational Are there limits of rationality 5 What explains action and how What is the role of deliberation in rationality 6 How is akrasia possible if you think it is 7 How do you think your own work has contributed to the field What are your plans for future research The outcome is of great interest not only for philosophers but also for economists psychologists political scientists and sociologists *The Existence Principle* Q.B. Gibson, 2012-12-06 When we ask whether something exists we expect a yes or no answer not a further query about what kind of existence how much of it whether we mean existence for you or existence for me or whether we are asking about some property which it might have In this book this simple requirement is defended and pursued into its various and sometimes surprising implications In the course of this pursuit such questions arise as Do appearances exist Do unknowable things exist Do past and future exist Does God necessarily exist This novel and non technical approach to important philosophical questions will be of interest to senior students of philosophy and indeed to all general readers with philosophical interests

Knowing Art Matthew Kieran, Dominic McIver Lopes, 2007-10-20 Artworks potentially convey two kinds of knowledge They obviously afford knowledge of art itself and they also afford general empirical knowledge especially knowledge of human psychology and value Knowing Art collects ten original essays written by leading philosophers who distill and build upon recent work at the intersection of aesthetics and epistemology Specific topics addressed include the objectivity of critical knowledge the quality of critical testimony the roles of principles and perception in critical reasoning phenomenal

knowledge of what a work of art is like the acquisition of factual information and psychological understanding from fictions and the limits of images as sources of historical evidence In addressing these topics the volume also explores the challenges that art poses for theories of knowledge as well as the challenges that artistic knowledge poses to traditional views about art

Philosophy of Probability J.P. Dubucs, 2013-04-17 Philosophy of Probability provides a comprehensive introduction to theoretical issues that occupy a central position in disciplines ranging from philosophy of mind and epistemology to cognitive science decision theory and artificial intelligence Some contributions shed new light on the standard conceptions of probability Bayesianism logical and computational theories others offer detailed analyses of two important topics in the field of cognitive science the meaning and the representation of partial belief and the management of uncertainty The authors of this well balanced account are philosophers as well as computer scientists among them L J Cohen D Miller P Gärdenfors J Vickers D Dubois and H Prade This multidisciplinary approach to probability is designed to illuminate the intricacies of the problems in the domain of cognitive inquiry No one interested in epistemology or artificial intelligence will want to miss it
