MacIntyre, Alastair Henry, 2014-10-14 This landmark volume offers a collection of conceptual papers and empirical research studies that investigate the dynamics of language learning motivation from a complex dynamic systems perspective. The contributors include some of the most well-established scholars from three continents all addressing the question of how we can understand motivation if we perceive it as continuously changing and evolving rather than as a fixed learner trait. The data-based studies also provide useful research models and templates for graduate students and scholars in the fields of applied linguistics and SLA who are interested in engaging with the intriguing area of examining language learning in a dynamic vein. *Promoting Reflection on Language Learning* Neil Curry, Phoebe Lyon, Jo Mynard, 2023-09-12 This book brings together a wide range of studies, practical applications and reflective accounts written by academics working at a university in Japan to present a cohesive overview of their collaborative efforts to promote learner reflection within their institution. The book contributes to a shift in language education towards promoting learner responsibility and ownership of their learning through developing a deeper sense of awareness of and motivation for the learning process. It makes a convincing case for showing that not only is promoting reflection possible but it can also be effectively integrated into language learning activities with significant benefits to the learners. The chapters are highly practical for researchers and practitioners with the research chapters containing instruments which make them ideal for replication studies. The text includes a wealth of practical tools and activities for practitioners who will be able to experience first-hand how to facilitate student success and increase satisfaction. The Routledge Handbook of English Language Teaching Graham Hall, 2016-05-12 The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT, TESOL and Language Teacher Education and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from broader contextual issues to a narrower focus on classrooms and classroom discourse, the volume's inter-related themes focus on ELT in the world, contexts and goals, planning and organising ELT curriculum, resources and settings, methods and methodology, perspectives and practices, second language learning and learners, teaching language knowledge, skills and pedagogy, understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter.
