Mixing Music Russ Hepworth-Sawyer, Jay Hodgson, 2016-12-01 This series Perspectives On Music Production collects detailed and experientially informed considerations of record production from a multitude of perspectives by authors working in a wide array of academic creative and professional contexts We solicit the perspectives of scholars of every disciplinary stripe alongside recordists and recording musicians themselves to provide a fully comprehensive analytic point of view on each component stage of record production Each volume in the series thus focuses directly on a distinct aesthetic moment in a record s production from pre production through recording audio engineering mixing and mastering to marketing and promotions This first volume in the series titled Mixing Music focuses directly on the mixing process This book includes References and citations to existing academic works contributors draw new conclusions from their personal research interviews and experience Models innovative methodological approaches to studying music production Helps specify the term record production especially as it is currently used in the broader field of music production studies **Microphone**

Techniques in Stereo and Surround Recording Adam Rosiński, 2022-11-22 Sound engineering is one of the fastest growing branches of music production The need for a broad based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance revealing that sound engineering should not be investigated only in the mathematical and physical context musical acoustics or the engineering aspect signal processing and modification Publications targeted primarily at musicians are few and far between which is why the mutual understanding for different

priorities which effectively concern the same issues faced by the engineer the acoustician and the musician seems to be a complex problem and the main concept explored in this publication This book is intended for musicians or sound directors but also acousticians and sound engineers wishing to learn how the musicians think The monograph is also addressed to musicians who intend to record their material in the studio in the near future but do not possess knowledge on studio construction studio workflow or the art of recording It seems important to familiarize the musicians with the reality that awaits them on the other side of the glass thus fostering their responsibility for the work jointly produced by them entering the studio and the sound director

Recording and Voice Processing, Volume 2 Jean-Michel Réveillac, 2021-12-22 Capturing recording and broadcasting the voice is often difficult Many factors must be taken into account and achieving a true representation is much more complex than one might think The capture devices such as the position of the singer s or narrator s the acoustics atmosphere and equipment are just some of the physical aspects that need to be mastered Then there is the passage through the analog or digital channel which disrupts the audio signal as well as the processes that are often required to enrich improve or even transform the vocal timbre and tessitura While in the past these processes were purely material today digital technologies and software produce surprising results that every professional in recording and broadcasting should know how to master *Recording and Voice Processing 2* focuses on live and studio voice recordings It presents the various pieces of hardware and software necessary for voice recording and details possible sound channel configurations based on recording location An actual recording and its various constraints is then considered addressing the pitfalls to avoid and the strategies to use in order to achieve a satisfactory result Different special effects vocoder auto tune Melodyne etc that can be used on the voice whether spoken or sung are also presented
