Other Space Race Eisenhower Transforming:

The Other Space Race Nicholas Michael Sambaluk,2015-12-15 The Other Space Race is a unique look at the early U S space program and how it both shaped and was shaped by politics during the Cold War Eisenhower s New Look expanded the role of the Air Force in national security and ultimately allowed ambitious aerospace projects namely the Dyna Soar a bomber equipped with nuclear weapons that would operate in space Eisenhower s space policy was purely practical creating a strong deterrent against the use of nuclear arms against the United States With the Soviet launch of Sputnik in 1957 the political climate changed and space travel became part of the United States national discourse Sambaluk explores what followed including the scuttling of the Dyna Soar program and the transition from Eisenhower s space policy to John Kennedy s This well argued well researched book gives much needed perspective on the Cold War s influence on space travel and its relation to the formation of public policy

Always at War Melvin G. Deaile,2018-04-15 Always at War is the story of Strategic Air Command SAC during the early decades of the Cold War More than a simple history it describes how an organization dominated by experienced World War II airmen developed a unique culture that thrives to this day Strategic Air Command was created because of the Air Force s internal beliefs but the organization evolved as it responded to the external environment created by the Cold War In the aftermath of World War II and the creation of an independent air service the Air Force formed SAC because of a belief in the military potential of strategic bombing centralized under one commander As the Cold War intensified so did SAC s mission In order to prepare SAC s warriors to daily fight an enemy they did not see as well as to handle the world s most dangerous arsenal the command led by General Curtis LeMay emphasized security personal responsibility and competition among the command Its resources political influence and manning grew as did its culture until reaching its peak during the Cuban Missile Crisis SAC became synonymous with the Cold War and its culture forever changed the Air Force as well as those who served

An Untaken Road Steven A Pomeroy,2016-01-15 Steven A Pomeroy has authored the first history of the American mobile intercontinental ballistic missile ICBM a technology the United States spent four decades and billions of dollars creating but never deployed An Untaken Road showcases how the evolution of a technology that ultimately never existed and the politics that surrounded it end up significantly shaping American nuclear strategy and forces for decades Utilizing recently declassified documents years of experience and an unrivaled passion for the history of military technologies Pomeroy has created a new framework on the nature of strategic weapons technology innovation This thorough study of a road not taken is a must read for those seeking to understand the challenges and constraints on U S military weapon programs especially when inter organization competition domestic politics strategic needs and new technologies collide

Mars Adapting Francis Hoffman,2021-03-15 As Clausewitz observed In war more than anywhere else things do not turn out as we expect The essence of war is a competitive reciprocal relationship with an adversary Commanders and institutional leaders must recognize shortfalls and resolve gaps rapidly in the middle of the fog

of war The side that reacts best and absorbs faster increases its chances of winning Mars Adapting examines what makes some military organizations better at this contest than others It explores the institutional characteristics or attributes at play in learning quickly Adaptation requires a dynamic process of acquiring knowledge the utilization of that knowledge to alter a unit's skills and the sharing of that learning to other units to integrate and institutionalize better operational practice Mars Adapting explores the internal institutional factors that promote and enable military adaptation It employs four cases drawing upon one from each of the U S armed services Each case was an extensive campaign with several cycles of action counteraction In each case the military institution entered the war with an existing mental model of the war they expected to fight For example the U S Navy prepared for decades to defeat the Japanese Imperial Navy and had developed carrier based aviation Other capabilities particularly the Fleet submarine were applied as a major adaptation The author establishes a theory called Organizational Learning Capacity that captures the transition of experience and knowledge from individuals into larger and higher levels of each military service through four major steps The learning change cycle is influenced he argues by four institutional attributes leadership organizational culture learning mechanisms and dissemination mechanisms The dynamic interplay of these institutional enablers shaped their ability to perceive and change appropriately

Overcoming Overuse: Energy Transformation for a World Gone Mad Mats R. Larsson, 2009-12-03 An increasing number of experts argue that we need to cut down on our energy use Then why has so little activity started to actually solve this problem The answer is that we need strong leadership a program of managed change and clear communication to all citizens describing their role in the transformation process Additionally we need mental images of the future of our society and the way forward through the transformation program Despite the urgency of the situation few understand what the future will demand and how we can solve the issues that now face humanity Mats R Larsson tells us that we need to face the issues related to energy systems transformation In order for society to do this we need strong and determined leaders who are not afraid of telling the truth and make tough decisions In this book he outlines many of the leadership challenges that face us and he provides a way forward

for safeguarding an increasingly online infrastructure Transformation of the Indian Armed Forces: 2025 Maj Gen A K Lal (Retd), 2012-05-09 Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities Science, Technology and the Cultural Cold War in Asia Yuka Moriguchi Tsuchiya, 2022-07-12 Tsuchiya presents a new insight into the political roles of science and technology during the Cold War era in Asia The Cold War was not only a battle of conflicting ideologies and economic systems but also a competition of cultures and lifestyles and a battle to win the hearts and minds of people in developing countries Tsuchiya argues that science and technology were an integral part of how culture was deployed strategically She discusses the 1950s and early 1960s the Eisenhower and Kennedy presidencies in the U S and the decolonization and nation building efforts in Japan South Vietnam Burma and Indonesia She also sheds light on the way U S technological aid programs such as Foreign Atoms for Peace and the overseas information program were received by Asian leaders technocrats and scientists Provides valuable insight for scholars of Cold War History in Asia and US Foreign Policy *Training for Victory* Frank Kenneth Sobchak, 2024-11-19 One of the most difficult security challenges of the post Cold War era has been stabilizing failing states in an era of irregular warfare A consistent component of the strategy to address this problem has been security force assistance where outside powers train and advise the host nation s military Despite billions of dollars spent the commitment of thousands of advisors and innumerable casualties the American efforts in Afghanistan and Iraq failed catastrophically Nevertheless among those colossal military disasters were pockets of success The Iraqi Special Operations Forces ISOF held back the Islamic State in 2014 long enough to allow American and allied forces to flow back into the country and many Afghan commando units fought to the bitter end as their country disintegrated around them What made those units successful while the larger missions ended disastrously Author Frank K Sobchak explores security force assistance across five case studies examining what factors were most critical for U S Special Forces units to build capable partners like the ISOF and the commandos More specifically the book assesses the impact of five components of Special

Forces advisory missions language training and cultural awareness of the advising force the partner force to advisor ratio the advisors ability to organize host nation forces whether advisors are permitted to guide in combat and the consistency in advisor pairing Based on the experiences of U S Army Special Forces in El Salvador 1981 1991 Colombia 2002 2016 the Philippines 2001 2015 Iraq 2003 2011 and Afghanistan 2007 2021 Sobchak argues that the most crucial factors in producing combat effective partners are consistency in advisor pairing and maintaining a partner force to advisor ratio of twelve special forces soldiers advising a company sized force or smaller Intriguingly and counter to conventional wisdom at first glance language training and cultural awareness do not seem to be critical factors as most of the Green Berets that trained units in Iraq and Afghanistan lacked both capabilities Despite an orthodoxy that argues the opposite there is little evidence that combat advising is decisive in producing effective partners and there is conflicting evidence that language training and cultural awareness are important Many of these findings while focused on Special Forces operations and doctrine could be used to improve the odds of success for larger security force assistance missions as well

The Cool War Sean M. Maloney, 2025-10-14 Sean Maloney reveals how Vladimir Putin has aggressively leveraged nuclear signaling to manipulate NATO and deter Western intervention in Ukraine With Cold War level brinkmanship and modern information warfare Russia's tactics have reshaped the strategic landscape and raised urgent questions about how long the West can hold the line Nuclear signaling is defined as the deliberate maneuvering of nuclear forces to deter and influence an adversary's actions Author Sean Maloney shows how Russian leader Vladimir Putin has systematically employed nuclear signaling to force desired behavior from both NATO and the United States This strategy has escalated greatly during the Russo Ukraine War as Putin seeks to deter Western intervention and support of Ukraine Putin uses many forms of nuclear signaling including ordering jets capable of carrying nuclear weapons to fly in western European airspace staging a joint bomber exercise with China near Alaska and instructing submarines carrying nuclear weapons to surface through the Arctic icepack The frequency of this signaling far exceeds that of similar activity during the Cold War and has escalated to more dangerous levels than before When Russia experienced setbacks on the battlefield Putin often intensified his nuclear force posturing by paring it with thinly veiled threats to use tactical nuclear weapons Maloney argues convincingly that in the post Cold War era Putin has skillfully combined his use of nuclear signaling with advances in information technology to more effectively manipulate Western nations He asserts that the United States was initially late in recognizing this development but as the situation worsened America and NATO have devised a series of responses that now hold Russia in check The question is for how long Maloney concludes that Putin's nuclear posturing has produced mixed results First and foremost Putin did successfully deter the United States and other NATO countries from outright military action in defense of Ukraine following the 2022 invasion However Russia's nuclear signaling did not prevent the West from providing weapons and intelligence to Ukraine nor did it stop NATO's expansion Nevertheless the partial success of Russia's Cool War activity does not lessen the significance of this

new reality or the scope of the problems that face the West moving forward
