Principles And Practice Of Pet And Petct:

Principles and Practice of Behavioral Neurology and Neuropsychology Matthew Rizzo, Paul J. Eslinger, 2004

Written on a non specialist level this highly practical text emphasizes the basic principles and applications of behavioral neurology and neuropsychology. Emphasis is on the broad recognition of the signs and symptoms of neurobehavioral disorders and attendant acute and long term management strategies. The text covers the broad recognition of signs and symptoms, acute and long term management strategies and current therapeutic options. Each chapter begins with an outline and highlighted key words and main points. Each chapter ends with a list of main points and key readings, glossary and references. Each chapter contains a generous number of charts, tables, algorithms and figures.

Principles of Neurotheology

Assoc Prof Andrew B Newberg, 2013-06-28. Neurotheology has garnered substantial attention in the academic and lay communities in recent years. Several books have been written addressing the relationship between the brain and religious experience and numerous scholarly articles have been published on the topic, some in the popular press. The scientific and religious communities have been very interested in obtaining more information regarding neurotheology, how to approach this topic and how science and religion can be integrated in some manner that preserves both. If neurotheology is to be considered a viable field going forward, it requires a set of clear principles that can be generally agreed upon and supported by both the theological or religious perspective and the scientific one as well. **Principles of Neurotheology** sets out the necessary principles of neurotheology which can be used as a foundation for future neurotheological discourse. Laying the groundwork for a new synthesis of scientific and theological dialogue, this book proposes that neurotheology, a term fraught with potential problems, is a highly useful and important voice in the greater study of religious and theological ideas and their intersection with science.
