Applications in High Resolution Mass Spectrometry Roberto Romero-González, Antonia Garrido Frenich, 2017-03-07. *Applications of High Resolution Mass Spectrometry: Food Safety and Pesticide Residue Analysis* is the first book to offer complete coverage of all aspects of high resolution mass spectrometry (HRMS) used for the analysis of pesticide residue in food. Aimed at researchers and graduate students in food safety, toxicology and analytical chemistry, the book equips readers with foundational knowledge of HRMS, including established and state-of-the-art principles and analysis strategies. Additionally, it provides a roadmap for implementation, including discussions of the latest instrumentation and software available. Detailed coverage is given to the application of HRMS coupled to ultra-high performance liquid chromatography (UHPLC) for the analysis of pesticide residue in fruits and vegetables and food of animal origin. The book also discusses extraction procedures and the challenges of sample preparation, gas chromatography coupled to high resolution mass spectrometry (GC-HRMS), flow injection HRMS, ambient ionization and identification of pesticide transformation products in food. Responding to the fast development and application of these new procedures, this book is an essential resource in the food safety field. Arms researchers with an in-depth resource devoted to the rapid advances in HRMS tools and strategies for pesticide residue analysis in food. Provides a complete overview of analytical methodologies and applications of HRMS, including UHPLC-HRMS, HRMS coupled with time-of-flight (TOF) and/or GC-Orbitrap and flow injection HRMS. Discusses the current international regulations and legislation related to the use of HRMS in pesticide residue analysis. Features a chapter on the hardware and software available for HRMS implementation. Offers separate chapters on HRMS applied to pesticide residue analysis in fruits and vegetables and in food of animal origin.

Introduction to Mass Spectrometry J. Throck Watson, O. David Sparkman, 2013-07-09. Completely revised and updated, this text provides an easy-to-read guide to the concept of mass spectrometry and demonstrates its potential and limitations. Written by internationally recognised experts and utilising real-life examples of analyses and applications, the book presents real cases of qualitative and quantitative applications of mass spectrometry. Unlike other mass spectrometry texts, this comprehensive reference provides systematic descriptions of the various types of mass analysers and ionisation, along with corresponding strategies for interpretation of

data The book concludes with a comprehensive 3000 references This multi disciplined text covers the fundamentals as well as recent advance in this topic providing need to know information for researchers in many disciplines including pharmaceutical environmental and biomedical analysis who are utilizing mass spectrometry

Applications of Time-of-Flight and Orbitrap Mass Spectrometry in Environmental, Food, Doping, and Forensic Analysis

,2016-06-02 Applications of Time of Flight and Orbitrap Mass Spectrometry in Environmental Food Doping and Forensic Analysis deals with the use of high resolution mass spectrometry MS in the analysis of small organic molecules Over the past few years time of flight ToF and Orbitrap MS have both experienced tremendous growth in a great number of analytical sectors and are now well established in many laboratories where high requirements are placed on analytical performance This book gives a head to head comparison of these two technologies that compete directly with each other As users with hands on experience in both techniques the authors provide a balanced description of the strengths and weaknesses of both techniques In the vast majority of cases ToF MS and Orbitrap MS have been used for qualitative purposes mainly identification of discrete molecular entities such as drug metabolites or transformation products of environmental contaminants This paradigm is now changing as quantitative capabilities are increasingly being explored as are non target approaches for unbiased broad scope screening In view of the continuous innovation of high resolution MS instrument manufacturers in designing and developing more powerful machines technological advances in both hardware and software are considerable with many novel applications This book summarizes and analyzes these trends The compilation of selected examples from diverse analytical fields will allow the readers to discover not only the potential of high resolution MS in their sector but also shows advances in other fields that rely on hi res MS Provides comprehensive coverage of applications of time of flight and orbitrap mass spectrometry in environmental food doping and forensic analysis Explores a variety of specialized techniques giving a balanced description of the strengths and weaknesses of each Presents a general overview of imaging techniques within analysis
