Question Nationale Xixe Siecle:

The Creation of National Identities Anne-Marie Thiesse, 2021-11-29 There is nothing more international than the formation of national identities From barbarian epics to ethnographic museums from national languages to emblematic landscapes or typical costumes this book retraces the cultural fabrication of the European nations documenting how national identities are not facts of nature but constructions The list of basic elements of a national identity is well known ancestral founders a history heroes a language monuments landscapes and folklore Compiling this list was the great enterprise carried out throughout Europe during the last two centuries Patriotic militancy and the transnational exchanges of ideas and know how created identities that are very specific but similar precisely in their difference **British Identities before**

Nationalism Colin Kidd, 1999-03-13 Inspired by debates among political scientists over the strength and depth of the pre modern roots of nationalism this study attempts to gauge the status of ethnic identities in an era whose dominant loyalties and modes of political argument were confessional institutional and juridical Colin Kidd s point of departure is the widely shared orthodox belief that the whole world had been peopled by the offspring of Noah In addition Kidd probes inconsistencies in national myths of origin and ancient constitutional claims and considers points of contact which existed in the early modern era between ethnic identities which are now viewed as antithetical including those of Celts and Saxons He also argues that Gothicism qualified the notorious Francophobia of eighteenth century Britons A wide ranging example of the new British history this study draws upon evidence from England Scotland Ireland and America while remaining alert to European comparisons and influences **The Impact of the First World War on the Basque Country** Eneko

Bidegain, 2025-03-01 This book tells the story of the First World War from the perspective of the Basque Country It recounts the background to the First World War to set context and talks about how this war was experienced in the Basque Country including the after effects it left behind especially the human devastation wrought by the war The social economic and political consequences it had in the Basque Country are discussed in this work as it is clear that this conflict had a decisive influence on the future of the Northern Basque Country and its ties with France Nationalism, Ethnicity and the State John Coakley, 2012-11-12 This exciting new book is the first to offer a truly comprehensive account of the vibrant topic of nationalism Packed with a series of rich illustrative examples the book examines this powerful and remarkable political force by exploring Definitions of nationalism Language and nationalism Religion and Nationalism Nationalist history The social roots of ideologies and the significance of race gender and class Nationalist movements from dominant majorities to peripheral minorities socio economic and sociological perspectives State responses to nationalism Supported by a number of helpful illustrations tables and diagrams the text is both engaging and highly informative Nationalism Ethnicity and the State Making and Breaking Nations will prove an insightful read for both undergraduate and postgraduate students and researchers in the area of Politics and International Relations **The Body Populace** Heinrich Hartmann, 2019-01-15 How

data gathered from national conscriptions in pre World War I Europe influenced understandings of population fitness and redefined society as a collective body In pre World War I Europe individual fitness was increasingly related to building and preserving collective society Army recruitment offered the most important opportunity to screen male citizens fitness raising questions of how to define fitness for soldiers and how to translate this criteria outside the military context In this book Heinrich Hartmann explores the historical circumstances that shaped collective understandings of fitness in Europe before World War I and how these were intertwined with a fear of demographic decline and degeneration This dynamic gained momentum through the circulation of knowledge among European nations but also through the scenarios of military confrontations Hartmann provides a science history of military statistics in Germany France and Switzerland in the decades preceding World War I considering how information gathered during national conscriptions generated data about the health and fitness of the population Defined by masculine concepts conscription examinations went far beyond the individuals they tested and measured Scholars of the time aspired to pin down the nation in concrete numerical terms drawing on data from examinations to redefine society as a collective body that could be counted measured and examined *The Body Populace* explores the historical specificity and contingency of data gathering techniques recounts their uses and abuses and provides a timely contribution to the growing historiography of Big Data It sheds light on a crucial moment in nineteenth and early twentieth century European history when statistical data and demographical knowledge shaped new notions of masculinity fostered fears of degeneration and gave rise to eugenic thinking

2010 Massimo Mastrogregori, 2014-12-12 Every year the Bibliography catalogues the most important new publications historiographical monographs and journal articles throughout the world extending from prehistory and ancient history to the most recent contemporary historical studies Within the systematic classification according to epoch region and historical discipline works are also listed according to author s name and characteristic keywords in their title

Socio-political Histories of Latin American Statistics Cecilia T. Lanata-Briones, Andrés Estefane, Claudia Jorgelina Daniel, 2022-04-22 This book brings together recent research on the sociopolitical history of Latin American statistics from the nineteenth to the first half of the twentieth century Reflecting the influence of social constructivism in the social sciences it sheds new light on the historical emergence and development of both statistical reasoning and practices within a region traditionally seen as a passive consumer of foreign produced theories and methods By analysing the processes of institutionalisation of statistics in different national spaces from Mexico to the Southern Cone these studies show the unique ways in which Latin America adapted and used this modern tool of government and social classification to build political regimes and scientific arenas The early enthusiasm for enumerating reality the regular production of statistics and censuses and the role of the region in the global transformation of this knowledge are some of the aspects reviewed to grasp the contingent dynamic of these dialogues and appropriations Thus Socio political

Histories of Latin American Statistics seeks to offer new insights into the divergent regional trajectories of this discipline advancing towards an understanding of statistics and its past from a truly global perspective **Cartophilia** Catherine Tatiana Dunlop, 2015-05-11 The period between the French Revolution and World War II was a time of tremendous growth in both mapmaking and map reading throughout Europe There is no better place to witness this rise of popular cartography than in Alsace Lorraine a disputed borderland that the French and Germans both claimed as their national territory Desired for its prime geographical position and abundant natural resources Alsace Lorraine endured devastating wars from 1870 to 1945 that altered its borders four times transforming its physical landscape and the political allegiances of its citizens For the border population whose lives were turned upside down by the French German conflict maps became essential tools for finding a new sense of place and a new sense of identity in their changing national and regional communities Turning to a previously undiscovered archive of popular maps Cartophilia reveals Alsace Lorraine s lively world of citizen mapmakers that included linguists ethnographers schoolteachers hikers and priests Together this fresh group of mapmakers invented new genres of maps that framed French and German territory in original ways through experimental surveying techniques orientations scales colors and iconography In focusing on the power of bottom up maps to transform modern European identities Cartophilia argues that the history of cartography must expand beyond the study of elite maps and shift its emphasis to the democratization of cartography in the modern world
