

Tutorial 7 Quick Check Answers

Section 7.1 Quick Check

1. The table style is applied to all rows in the new column; the range of the Excel table expands to include the new column (Phone). All features that apply to other columns in the table also apply to the Phone column.
2. a calculated column
3. In cell Q7, enter = IF(Q5*Q6 > 10000,Q5*Q6,10000)
4. False; the AND function is a logical function that returns a TRUE value if all logical conditions are TRUE; otherwise, it returns a FALSE value.
5. =IF(AND(X5>0,R5<3/15/2013),"Outstanding","")
6. structured references
7. Ignore; all tests are False so the OR function returns FALSE
8. OR(B25<17,B25>42)

Section 7.2 Quick Check

1. nested IF
2. Younger
3. An exact match compares the lookup value to the compare value. They must be equal for a value to be returned from the lookup table. An approximate match also compares the lookup value to the compare value. The two values do not have to be equal, just fall with a range of values for Excel to return a value from the lookup table.
4. the VLOOKUP function
- 5.

0	Freshmen
30	Sophomore
60	Junior
90	Senior

6. =IFERROR(W5/W25,"Dividing by zero")

Developing Thinking in Statistics Alan Graham, 2006-02-08 This book should prove to be an important addition to the relatively few publications that exist on statistical thinking. It very nicely encourages the reader to take an active learning approach through simultaneously promoting pedagogy with knowledge and skills enhancement in statistics. Understanding what the subject is for and what it can do are crucial in statistical education by getting the reader to think statistically. Mr Graham has provided us with a very readable book that helps to dispel the poor reputation that statistics has acquired over many years. Professor Neville Davies, Director Royal Statistical Society Centre for Statistical Education, Nottingham Trent University. Statistics is a key area of the school mathematics curriculum where maths and the real world meet. Although potentially a subject where teaching can be motivating and relevant to everyday concerns, it is often seen as boring and involving largely mechanical calculations. This book will enable teachers and others interested in statistical thinking to become excited and inspired by the big ideas of statistics and in turn teach them enthusiastically. Designed to heighten awareness of statistical ideas, the book explores key themes within statistics using ideas developed by the influential team at The Open University's Centre for Mathematics Education. Themes include Measurement, Variation, Randomness, Uncertainty. Arranged in an accessible task-based format, this is an essential text for all secondary maths teachers and students of maths education. It is a comprehensive book that will illuminate and inspire interest in the subject based on innovative use of ICT, engaging narrative, firm research and good practice. **Developing Thinking in Statistics** is a set book on the Open University Course ME626 Developing Statistical Thinking, part of the Graduate Diploma in Mathematics Education.

Intermediate Microeconomics Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the *Intermediate Microeconomics An Interactive Approach Workbook*
