Sustainable ICTs and Management Systems for Green Computing Hu, Wen-Chen, Kaabouch, Naima, 2012-06-30 This book focuses on information technology using sustainable green computing to reduce energy and resources used Provided by publisher

Security in Fixed and Wireless Networks Guenter Schaefer, Michael Rossberg, 2016-10-17 Introduces aspects on security threats and their countermeasures in both fixed and wireless networks advising on how countermeasures can provide secure communication infrastructures Enables the reader to understand the risks of inappropriate network security what mechanisms and protocols can be deployed to counter these risks and how these mechanisms and protocols work

Next-Generation Internet Byrav Ramamurthy, George N. Rouskas, Krishna Moorthy Sivalingam, 2011-02-03 With ever increasing demands on capacity quality of service speed and reliability current Internet systems are under strain and under review Combining contributions from experts in the field this book captures the most recent and innovative designs architectures protocols and mechanisms that will enable researchers to successfully build the next generation Internet A broad perspective is provided with topics including innovations at the physical transmission layer in wired and wireless media as well as the support for new switching and routing paradigms at the device and sub system layer The proposed alternatives to TCP and UDP at the data transport layer for emerging environments are also covered as are the novel models and theoretical foundations proposed for understanding network complexity Finally new approaches for pricing and network economics are discussed making this ideal for students researchers and practitioners who need to know about designing constructing and operating the next generation Internet

Proceedings of the Multi-Conference 2011 Himanshu B. Soni, Apurva Shah, 2011-06-06 The International Conference on Signals Systems and Automation ICSSA 2011 aims to spread awareness in the research and academic community regarding cutting edge technological advancements revolutionizing the world The main emphasis of this conference is on dissemination of information experience and research

results on the current topics of interest through in depth discussions and participation of researchers from all over the world. The objective is to provide a platform to scientists, research scholars and industrialists for interacting and exchanging ideas in a number of research areas. This will facilitate communication among researchers in different fields of Electronics and Communication Engineering. The International Conference on Intelligent System and Data Processing ICISD 2011 is organized to address various issues that will foster the creation of intelligent solutions in the future. The primary goal of the conference is to bring together worldwide leading researchers, developers, practitioners and educators interested in advancing the state of the art in computational intelligence and data processing for exchanging knowledge that encompasses a broad range of disciplines among various distinct communities. Another goal is to promote scientific information interchange between researchers, developers, engineers, students and practitioners working in India and abroad.

Computational Intelligence, Cyber Security and Computational Models G. Sai Sundara Krishnan, R. Anitha, R. S. Lekshmi, M. Senthil Kumar, Anthony Bonato, Manuel Graña, 2013-11-26. This book contains cutting edge research material presented by researchers, engineers, developers and practitioners from academia and industry at the International Conference on Computational Intelligence, Cyber Security and Computational Models ICC3 organized by PSG College of Technology Coimbatore, India during December 19-21, 2013. The materials in the book include theory and applications to provide design analysis and modeling of the key areas. The book will be useful material for students, researchers, professionals as well as academicians in understanding current research trends and findings and future scope of research in computational intelligence, cyber security and computational models.

Modern Optimization Methods for Decision Making Under Risk and Uncertainty Alexei A. Gaivoronski, Pavlo S. Knopov, Volodymyr A. Zaslavskyi, 2023-10-06. The book comprises original articles on topical issues of risk theory, rational decision making, statistical decisions and control of stochastic systems. The articles are the outcome of a series of international projects involving the leading scholars in the field of modern stochastic optimization and decision making. The structure of stochastic optimization solvers is described. The solvers in general implement stochastic quasi gradient methods for optimization and identification of complex nonlinear models. These models constitute an important methodology for finding optimal decisions under risk and uncertainty. While a large part of current approaches towards optimization under uncertainty stems from linear programming (LP) and often results in large LPs of special structure, stochastic quasi gradient methods confront nonlinearities directly without need of linearization. This makes them an appropriate tool for solving complex nonlinear problems, concurrent optimization and simulation models and equilibrium situations of different types, for instance Nash or Stackelberg equilibrium situations. The solver finds the equilibrium solution when the optimization model describes the system with several actors. The solver is parallelizable, performing several simulation threads in parallel. It is capable of solving stochastic optimization problems, finding stochastic Nash equilibria and of composite stochastic bilevel problems where each level may require the solution of a stochastic optimization problem or

finding Nash equilibrium Several complex examples with applications to water resources management energy markets pricing of services on social networks are provided In the case of power system regulator makes decision on the final expansion plan considering the strategic behavior of regulated companies and coordinating the interests of different economic entities Such a plan can be an equilibrium a planned decision where a company cannot increase its expected gain unilaterally
