

The background of the book cover is a dramatic painting. The upper portion shows a dark, stormy sky with a small, distant light source. Below the sky, a landscape is depicted with a large, dark, rocky formation on the left. In the center, a figure is crouched, seemingly tending to a fire or a small object on the ground. To the right, a large, white, winged creature, possibly a pterosaur, is shown in flight. The lower portion of the cover is dominated by a large, intense fire that spreads across the landscape, with bright orange and yellow flames. The overall tone is one of survival and struggle in a harsh, prehistoric environment.

Shadowkings Michael Cobley, 2014-04-01 For one thousand bright and fortunate years the Khatrimantine

Empire had guaranteed peace and benevolence Then came the vast hordes of the Mogaun driven by an evil deity the Lord of Twilight corrupter and devourer The unprepared Khatrimantine armies could not stand against the brutal might of the invaders not even with the help of the Empire s spirit magical guardians Yet at the very pinnacle of his triumph the Lord of Twilight made a fatal mistake shattering his essence into five parts five lost souls destined to become the Shadowkings Now sixteen years after the invasion Mogaun warlords and petty despots squabble amid the ruins Yet ancient powers are stirring and the Empire s last valiant defenders are gathering their strength hoping that one decisive strike can reverse their long bleak decline But the forces of Night know well the dance of might and match them step for step

The Earth, Humanity and God Colin A. Russell, 2019-10-16 Originally published in 1994 The Earth Humanity and God discusses the relationship between science and religion The book discusses the condition of the earth as it was at the time of publication and the future prospects of the planet arguing that neither the conventional mechanistic view nor New Age philosophy helps alone in evaluating our relationship with the Earth The book examines methods of combatting the threats to the Earth exploring both a scientific and non scientific stance investigating the uncontrolled expansion of technology as well as empirical pre scientific mysticism The book also explores the resurgence in ancient ideas of Mother Earth as a dangerous piece of romantic irrationality and suggests that these views pose a danger to religious scientific examinations The book suggests instead a hard headed attempt to relate Biblical and scientific data and that this in turn can yield a valuable new understanding of the problems facing the world
