Selected Topics In Geometry With Classical Vs Computer Proving:

Selected Topics in Geometry with Classical Vs. Computer Proving Pavel Pech, 2007 This textbook presents various automatic techniques based on Gröbner bases elimination to prove well known geometrical theorems and formulas Besides proving theorems these methods are used to discover new formulas solve geometric inequalities and construct objects which cannot be easily done with a ruler and compass Each problem is firstly solved by an automatic theorem proving method Secondly problems are solved classically without using computer where possible so that readers can compare the strengths and weaknesses of both approaches

Selected Topics in Geometry with Classical Vs. Computer Proving Pavel Pech, 2007 Computer Algebra in Scientific Computing Vladimir P. Gerdt, Wolfram Koepf, Ernst W. Mayr, Evgenii V. Vorozhtsov, 2013-08-15 This book constitutes the proceedings of the 14th International Workshop on Computer Algebra in Scientific Computing CASC 2013 held in Berlin Germany in September 2013 The 33 full papers presented were carefully reviewed and selected for inclusion in this book The papers address issues such as polynomial algebra the solution of tropical linear systems and tropical polynomial systems the theory of matrices the use of computer algebra for the investigation of various mathematical and applied topics related to ordinary differential equations ODEs applications of symbolic computations for solving partial differential equations PDEs in mathematical physics problems arising at the application of computer algebra methods for finding infinitesimal symmetries applications of symbolic and symbolic numeric algorithms in mechanics and physics automatic differentiation the application of the CAS Mathematica for the simulation of quantum error correction in quantum computing the application of the CAS GAP for the enumeration of Schur rings over the group A_5 constructive computation of zero separation bounds for arithmetic expressions the parallel implementation of fast Fourier transforms with the aid of the Spiral library generation system the use of object oriented languages such as Java or Scala for implementation of categories as type classes a survey of industrial applications of approximate computer algebra

Computational Science and Its Applications - ICCSA 2011 Beniamino Murgante, Osvaldo Gervasi, Andres Iglesias, David Taniar, Bernady O. Apduhan, 2011-06-17 The five volume set LNCS 6782 6786 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications ICCSA 2011 held in Santander Spain in June 2011 The five volumes contain papers presenting a wealth of original research results in the field of computational science from foundational issues in computer science and mathematics to advanced applications in virtually all sciences making use of computational techniques The topics of the fully refereed papers are structured according to the five major conference themes geographical analysis urban modeling spatial statistics cities technologies and planning computational geometry and applications computer aided modeling simulation and analysis and mobile communications

Applications of Computer Algebra Ilias S. Kotsireas, Edgar Martínez-Moro, 2017-07-26 The Applications of Computer Algebra ACA conference covers a wide range of topics from Coding Theory to Differential Algebra to Quantum Computing

focusing on the interactions of these and other areas with the discipline of Computer Algebra This volume provides the latest developments in the field as well as its applications in various domains including communications modelling and theoretical physics The book will appeal to researchers and professors of computer algebra applied mathematics and computer science as well as to engineers and computer scientists engaged in research and development

Numerical and Symbolic Scientific Computing Ulrich Langer, Peter Paule, 2011-11-19 The book presents the state of the art and results and also includes articles pointing to future developments Most of the articles center around the theme of linear partial differential equations Major aspects are fast solvers in elastoplasticity symbolic analysis for boundary problems symbolic treatment of operators computer algebra and finite element methods a symbolic approach to finite difference schemes cylindrical algebraic decomposition and local Fourier analysis and white noise analysis for stochastic partial differential equations Further numerical symbolic topics range from applied and computational geometry to computer algebra methods used for total variation energy minimization

Automated Deduction in Geometry Pascal Schreck, Julien Narboux, Jürgen Richter-Gebert, 2011-11-22 This book constitutes the thoroughly refereed post workshop proceedings of the 8th International Workshop on Automated Deduction in Geometry ADG 2010 held in Munich Germany in July 2010 The 13 revised full papers presented were carefully selected during two rounds of reviewing and improvement from the lectures given at the workshop Topics addressed by the papers are incidence geometry using some kind of combinatoric argument computer algebra software implementation as well as logic and proof assistants

Automated Deduction in Geometry Francisco Botana, Pedro Quaresma, 2015-07-17 This book constitutes the thoroughly refereed post workshop proceedings of the 10th International Workshop on Automated Deduction in Geometry ADG 2014 held in Coimbra Portugal in July 2014 The 11 revised full papers presented in this volume were carefully selected from 20 submissions The papers show the trend set of current research in automated reasoning in geometry

ICGG 2018 - Proceedings of the 18th International Conference on Geometry and Graphics Luigi Cocchiarella, 2018-07-06 This book gathers peer reviewed papers presented at the 18th International Conference on Geometry and Graphics ICGG held in Milan Italy on August 3 7 2018 The spectrum of papers ranges from theoretical research to applications including education in several fields of science technology and the arts The ICGG 2018 mainly focused on the following topics and subtopics Theoretical Graphics and Geometry Geometry of Curves and Surfaces Kinematic and Descriptive Geometry Computer Aided Geometric Design Applied Geometry and Graphics Modeling of Objects Phenomena and Processes Applications of Geometry in Engineering Art and Architecture Computer Animation and Games Graphic Simulation in Urban and Territorial Studies Engineering Computer Graphics Computer Aided Design and Drafting Computational Geometry Geometric and Solid Modeling Image Synthesis Pattern Recognition Digital Image Processing and Graphics Education Education Technology Research Multimedia Educational Software Development E learning Virtual Reality Educational Systems Educational Software Development Tools MOOCs Given its breadth of coverage the book

introduces engineers architects and designers interested in computer applications graphics and geometry to the latest advances in the field with a particular focus on science the arts and mathematics education **Characterisation of Areal Surface Texture** Richard Leach, 2024-05-31 This second edition delves into surface topography exploring its impact on the functionality of various components Beginning with an introduction to surface topography in Chapter 1 the subsequent chapters delve into the areal field parameters feature parameters filtering methods and form removal techniques leading into more specialized topics such as fractal related multiscale geometric characterization and deep learning based quantification of surface texture With a focus on characterizing measurement data to glean functional insights the book presents a comprehensive framework adopted by the international community Through a diverse array of case studies spanning automotive applications road surface engineering additive manufacturing and precision machining readers are offered a holistic understanding of how areal techniques are pivotal in modern manufacturing industries This edition builds upon the foundation laid by its predecessor integrating evolving standards and additional case studies to provide an updated and comprehensive resource for modern surface engineering
