Predicting Presidential Elections And Other Things Second Edition:

Predicting Presidential Elections and Other Things, Second Edition Ray Fair, 2011-12-14 It's the economy stupid as Democratic strategist James Carville would say. After many years of study Ray C. Fair has found that the state of the economy has a dominant influence on national elections. Just in time for the 2012 presidential election, this new edition of his classic text *Predicting Presidential Elections and Other Things* provides us with a look into the likely future of our nation's political landscape but Fair doesn't stop there. Fair puts other national issues under the microscope as well, including congressional elections, Federal Reserve behavior, and inflation. In addition, he covers topics well beyond today's headlines as the book takes on questions of more direct personal interest such as wine quality, predicting football games, and aging effects in baseball. Which of your friends is most likely to have an extramarital affair? How important is class attendance for academic performance in college? How fast can you expect to run a race or perform some physical task at age 55 given your time at age 30? Read *Predicting Presidential Elections and Other Things* and find out. As Fair works his way through an incredibly broad range of questions and topics, he teaches and delights. The discussion that underlies each chapter topic moves from formulating theories about real-world phenomena to lessons on how to analyze data, test theories, and make predictions. At the end of this book, readers will walk away with more than mere predictions. They will have learned a new approach to thinking about many age-old concerns in public and private life and will have a myriad of fun facts to share. *Predicting Presidential Elections and Other Things* Ray C. Fair, 2002. What do the following events have in common? In 2000, the election between George W. Bush and Al Gore was a virtual tie. The 1989 and 1990 vintages have turned out to be two of the best ever for Bordeaux wines. In 2001, the Federal Reserve lowered the interest rate eleven times. The decade of the 1970s was one of the worst on record for U.S. inflation. In 2001, the author of this book at age 59 ran a marathon in 3 hours and 30 minutes but should have been able to do it in 3 hours and 15 minutes. This book shows clearly and simply how these diverse events can be explained by using the tools of the social sciences and statistics. It moves from a discussion of formulating theories about real-world phenomena to lessons on how to analyze data, test theories, and make predictions. Through the use of a rich array of examples, the book demonstrates the power and range of social science and statistical methods. In addition to big topics (presidential elections, Federal Reserve behavior, and inflation) and not quite so big topics (wine quality), the book takes on questions of more direct personal interest: Who of your friends is most likely to have an extramarital affair? How important is class attendance for academic performance in college? How fast can you expect to run a race or perform some physical task at age 55 given your time at age 30? In other words, how fast are you slowing down? As the author works his way through an incredibly broad range of questions and topics, demonstrating the usefulness of statistical theory and method, he gives the reader a new way of thinking about many age-old concerns in public and private life. **Old Tip vs. the Sly Fox** Richard J. Ellis, 2025-08-19. Usually remembered for its slogan "Tippecanoe and Tyler too," the election of 1840 is also the first presidential

election of which it might be truly said It s the economy stupid Tackling a contest best known for log cabins cider barrels and catchy songs this timely volume reveals that the election of 1840 might be better understood as a case study of how profoundly the economy shapes the presidential vote Richard J Ellis a veteran scholar of presidential politics suggests that the election pitting the Democratic incumbent Martin Van Buren against Whig William Henry Harrison should also be remembered as the first presidential election in which a major political party selected rather than merely anointed its nominee at a national nominating convention In this analysis the convention s selection as well as Henry Clay s post convention words and deeds emerge as crucial factors in the shaping of the nineteenth century partisan nation Exploring the puzzle of why the Whig Party s political titan Henry Clay lost out to a relative political also ran Ellis teases out the role the fluctuating economy and growing antislavery sentiment played in the party s fateful decision to nominate the Harrison Tyler ticket His work dismantles the caricature of the 1840 campaign a k a the carnival campaign as all froth and no substance instead giving due seriousness to the deeply held moral commitments as well as anxieties about the political system that informed the campaign In *Old Tip vs the Sly Fox* the campaign of 1840 can finally be seen clearly for what it was a contest of two profoundly different visions of policy and governance including fundamental still pressing questions about the place of the presidency and Congress in the US political system

Belenky, 2016-11-15 This book is open access under a CC BY 4 0 license This book addresses the peculiarities of the current presidential election system not yet addressed in other publications It argues that any rules for electing a President that may have a chance to replace the current ones should provide an equal representation of states as equal members of the Union and of the nation as a whole This book analyzes the National Popular Vote plan and shows that this plan may violate the Supreme Court decisions on the equality of votes cast in statewide popular elections held to choose state electors That is the National Popular Vote plan may violate the Equal Protection Clause of the Fourteenth Amendment The book proposes a new election system in which the will of the states and the will of the nation as a whole are determined by direct popular elections for President and Vice President in the 50 states and in D C This system a would elect President a candidate who is the choice of both the nation as a whole and of the states as equal members of the Union b would let the current system elect a President only if the nation as a whole and the states as equal members of the Union fail to agree on a common candidate and c would encourage the candidates to campaign nationwide The second edition has been updated to include a proposal on how to make established non major party presidential candidates and independent candidates welcome participants in national televised presidential debates with the major party candidates
