Corn,2011-10-13 We ve all been there Seduced by the sleek designs and smart capabilities of the newest gadgets we end up stumped by their complicated set up instructions and exasperating error messages In this fascinating history Joseph J Corn maps two centuries of consumer frustration and struggle with personal technologies Aggravation with the new machines people adopt and live with is as old as the industrial revolution Clocks sewing machines cameras lawn mowers bicycles electric lights cars and computers all can empower and exhilarate but they can also exact a form of servitude Adopters puzzle over which type and model to buy and then how to operate the device diagnose its troubles and meet its insatiable appetite for accessories replacement parts or upgrades It intrigues Corn that we put up with the frustrations our technology thrusts upon us battling with the unfamiliar and climbing the steep learning curves It is this ongoing struggle more than the uses to which we ultimately put our machines that animates this quizzical study Having extensively researched owner s manuals computer user group newsletters and how to literature Corn brings a fresh consumer oriented approach to the history of technology User Unfriendly will be valuable to historians of technology students of American culture and anyone interested in our modern dependency on machines and gadgets *Operative Manual of Endoscopic Surgery 2* A. Cuschieri,G. Buess,J. Perissat,2013-11-11 The second volume of Operative Manual of Endoscopic Surgery covers some of the operative endoscopic procedures which have been introduced into clinical practice since the publication of VoI 1 In the general section we have included an updated chapter on instrumentation and new chapters on anaesthetic management of patients undergoing endoscopic surgery and on video image and recording Both topics are of importance to the practice of endoscopic surgery

and have not been adequately covered in the reported literature Volume 2 deals with endoscopic procedures in the chest and abdomen There have been significant advances in thoracoscopic surgery during the past 2 years particular reference is made to anatomical pulmonary resections and oesophageal resections As far as the gastrointestinal tract is concerned we have included gastric and allied operations but have not covered the colorectal region as we believe that more evaluation is needed before definitive accounts can be written on endoscopic colorectal resections especially for cancer For this reason we have decided to defer this important topic to Vol 3 which is in preparation The same applies to laparoscopic repair of abdominal hernias The same layout has been adopted as in Vol 1 of the series with heavy emphasis on illustrative representation of the operative steps and techniques In the diagrams on sites of trocar cannulae we have indicated not only the site and size but also the functional role of each port
