Re Imaging Japanese Women:

Re-Imaging Japanese Women Anne E. Imamura, 1996-07-31 Re Imaging Japanese Women takes a revealing look at women whose voices have only recently begun to be heard in Japanese society politicians practitioners of traditional arts writers radicals wives mothers bar hostesses department store and blue collar workers This unique collection of essays gives a broad interdisciplinary view of contemporary Japanese women while challenging readers to see the development of Japanese women's lives against the backdrop of domestic and global change These essays provide a second generation analysis of roles issues and social change The collection brings up to date the work begun in Gail Lee Bernstein's *Recreating Japanese Women 1600-1945* California 1991 exploring disparities between the current range of images of Japanese women and the reality behind the choices women make

Women's Employment in Japan Kaye Broadbent, 2012-11-12 The low status accorded to part time workers in Japan has resulted in huge inequalities in the workplace This book examines the problem in depth using case study investigations in Japanese workplaces and reveals the extent of the inequality It shows how many part time workers most of whom are women are concentrated in low paid low skilled poorly unionised service sector jobs Part time workers in Japan work hours equivalent to or greater than full time workers but receive lower financial and welfare benefits than their full time colleagues Overall the book demonstrates that the way part time work is constructed in Japan reinforces and institutionalises the sexual division of labour

Japanese Women: Emerging from Subservience, 1868-1945, 2021-10-01 For the first time many of the world's leading scholars in the field of Japanese women's history met in Edinburgh in 2003 and presented papers addressing the themes of Pioneering Women in Japan and General Issues in Japanese Women's History This volume containing most of the papers which have been specially edited and revised for publication together with an in depth contextual Introduction by Dr Hiroko Tomida and Dr Gordon Daniels is the outcome By definition therefore the volume contains some of the most recent findings in this field in Japan Australia the United States and the UK and introduces new approaches to studying Japanese women's history In addition it contains a special contribution on Ichikawa Fusae by Professor Barbara Molony

The End of Transgression in Japanese Women's Writing David S. Holloway, 2024-12-31 This book argues for a new articulation of the ways in which transgression is theorized in contemporary literature by Japanese women Exploring the rhetorical and discursive mechanics of literary bad girls from fiction produced during the millennial turn 1990-2010 the book contends that women writers today deploy truant unruly restless and aggressive female protagonists not to challenge the status quo but rather to reaffirm it While Japanese women's fiction has long been invested in cultivating an uncomfortable politics of opposition through unladylike themes such as sex sexuality and violence the book argues that today authors turn to such acts of defiance to quietly advocate for the primacy of Japanese social order Showing how transgression has not only lost its political and disruptive valence in contemporary women's fiction this book further reveals how discourses of dissent can be retooled to promote a conservative

worldview A fascinating literary analysis which reads Japanese literature in relation to the receding value of rebellion today this book will be of huge interest to students and scholars of Japanese literature gender and cultural studies *The Dynamics of Modern Asian Design* Sandy Ng, Megha Rajguru, 2025-10-16 Focusing on the late 20th century onward this book brings to light the ways in which design as a material form has underscored cultural social and economic changes across Asia The Dynamics of Modern Asian Design provides a deeper and more enhanced understanding of material culture in Asia through analysis of examples of ceramics electronic items fashion furniture interior design architecture and ornaments from across countries such as China Hong Kong India Japan and South Korea Authors explore the production of objects as agents in modern material life moving beyond their roles as commodities and addressing their values in a range of contexts and subjectivities Early chapters explore how ceramics and found objects are given innovative forms and meanings in their reincarnation and how the reinvention of material is critical when design is produced and valued Authors look at the intricate correlation between materials design practice and social change highlighting issues of cultural authenticity and tensions between local and global contexts They then interrogate the significance of visual appearance in material representations of modern women and religious artefacts exploring gender and religious representation through the analysis of magazines statues and objects of adornment The final section includes analysis of concrete urban design and electrical appliances specific to particular cultural and social contexts across modern and contemporary Asian cultures Unmarried Women in Japan Akiko Yoshida, 2016-11-10 Yoshida addresses the common misconceptions of single never married women and aims to uncover the major social and cultural factors contributing to this phenomenon in Japan Based on interviews with married and never married women aged 25-46 she argues that the increasing rate of female singlehood is largely due to structural barriers and a culture that has failed to keep up with economic changes Here is an academic book that is also reader friendly to the general audience it presents evidence from the interview transcripts in rich detail as well as insightful analysis Important sociological concepts and theories are also briefly explained to guide student readers in making connections Thus this book not only serves to enlighten readers on current issues in Japan it also provides sociological perspectives on contemporary gender inequality Marriage Migrants of Japanese Women in Australia Takeshi Hamano, 2019-05-30 This book investigates the experience of Japanese women who have immigrated to Australia through marriage to a local partner Based on long term participant observations gathered with a Japanese ethnic association in Sydney and on in depth interviews with the association's members it examines the ways in which the women remould themselves in Australia by constructing gendered selves that reflect their unique migratory circumstances through cross border marriage In turn the book argues that the women tend to embrace expressions of Japanese femininity that they once viewed negatively and that this is due to their lack of social skills and access to the cultural capital of mainstream Australian society Re molding the self through conventional Japanese notions of gender ironically provides them with a convincing identity that of minority migrant

women Nevertheless by analyzing these women s engagement with a Japanese ethnic association in a suburb of Sydney the book also reveals a nuanced sense of ambivalence a tension between the women s Japanese community and their lives in Australia Accordingly the book provides a fresh perspective on interdisciplinary issues of gender and migration in a globalized world and engages with a wide range of academic disciplines including sociology of migration sociology of culture cultural anthropology cultural studies Japanese studies Asian studies gender studies family studies migration studies and qualitative methodologies Career Women in Contemporary Japan Anne Stefanie Aronsson, 2014-10-24 Since Japan s economic recession began in the 1990s the female workforce has experienced revolutionary changes as greater numbers of women have sought to establish careers Employment trends indicate that increasingly white collar professional women are succeeding in breaking through the glass ceiling as digital technologies blur and redefine work in spatial gendered and ideological terms This book examines what motivates Japanese women to pursue professional careers in the contemporary neoliberal economy and how they reconfigure notions of selfhood while doing so It analyses how professional women contest conventional notions of femininity in contemporary Japan and in turn negotiate new gender roles and cultural assumptions about women whilst reorganizing the Japanese workplace and wider socio economic relationships Further the book explores how professional women create new social identities through the mutual conditioning of structure and self and asks how women come to understand their experiences how their actions change the gendering of the workforce and how their lives shape the economic political social and cultural landscapes of this post industrial nation Based on extensive fieldwork Career Women in Contemporary Japan will have broad appeal across a range of disciplines including Japanese culture and society gender and family studies women s studies anthropology ethnology and sociology **Women in Asia** Louise Edwards, Mina Roces, 2020-07-25 Women in Asia Tradition Modernity and Globalisation surveys the transformation in the status of women since 1970 in a diverse range of nations Malaysia China Indonesia Singapore the Philippines India Taiwan Vietnam Hong Kong Korea Japan and Burma Within these 13 national case studies the book presents new arguments about being women being Asian and being modern in contemporary Asia Recent social changes in women s place in society are untangled in recognition that not all change is progress and that not all modernity enhances women s status The authors suggest that the improvements in women s status within the Asian region vary dramatically according to the manner in which women interact with the particular economic and ideological forces in each nation Each contributor has focussed on a particular country in their area of expertise They present innovative arguments relating to the problem of being women in Asia during a period of dramatic social and political changes Each national case study explores key social and economic markers of women s status such as employment rates wage differentials literacy rates and participation in politics or business The effects of population control programs legislation on domestic violence and female infanticide and women s role in the family and the workforce are also discussed The book poses questions as to how women have negotiated these shifts and in the process created a

modern Asian woman Specialists from a variety of disciplines including history anthropology sociology demography gender studies and psychology grapple with the complexities and ambivalences presented by the multiple faces of the modern Asian woman Complete with a list of recommended readings and a web site with links to electronic resources the book will be of particular interest to undergraduate students of Asian studies and women s studies as well as scholars and postgraduate students interested in comparative women s studies *Refugees, Women, and Weapons* Petrice R. Flowers, 2009-07-24 In a world dominated by considerations of material and security threats Japan provides a fascinating case for why and under what conditions a state would choose to adopt international norms and laws that are seemingly in direct conflict with its domestic norms Approaching compliance from within a constructivist framework author Petrice R Flowers analyzes three treaties addressing refugee policy women s employment and the use of land mines that Japan has adopted *Refugees Women and Weapons* probes how international relations and domestic politics both play a role in constructing state identity and how state identity in turn influences compliance Flowers argues that although state desire for legitimacy is a key factor in norm adoption to achieve anything other than a low level of compliance requires strong domestic advocacy She offers a comprehensive theoretical model that tests the explanatory power of two understudied factors the strength of nonstate actors and the degree to which international and domestic norms conflict Flowers evaluates how these factors typically studied and analyzed individually interact and affect one another
