

ELEMENTAL REACTIONS GUIDE

SWIRL

Anemo Swirls with Geo, Pyro, Electro and Hydro to create a Swirl, which deals the same element's damage to enemies it is in contact with. Damage based on Character Level and Skill/Elemental Burst. Secondary Swirls deal damage calculated by the first Character's elemental mastery. Damage cap: 10k.

CRYSTALIZE

Geo Swirls with Geo, Pyro, Electro and Hydro to create a Crystal, that falls on the ground, inflicting up to the crystal's max HP. A shield which reduces elemental damage from that type.

OVERLOAD

Electro Swirls with Pyro to create OVERLOAD. Overload damage is based on the level of the character that triggers the reaction. Overload deals Pyro Damage in an AoE and deals shock damage to nearby structures and some can break.

SUPERCONDUCT

Electro Swirls with Cryo to create Superconduct. Superconduct deals AoE Cryo damage and reduces Physical DMG by 60%. Damage is based on the level of the Character that triggers the reaction. Cooldown lasts up to 8 seconds depending on Character Level.

ELECTRO-CHARGE

Electro Swirls with Hydro to create ELECTRO-CHARGE. Electro-Charge deals Electro damage twice to the same target, and then switches between all that characters in a large AoE. Electro-Charge can happen to the same target multiple times if they become wet again. Damage is based on the level of the Character that triggers the reaction.

MELT

Pyro Swirls with Cryo to create MELT. MELT actually has no damage. Damage based on which element is triggering the reaction. If Pyro triggers MELT, it deals Pyro damage equal to 1/2 the damage of the attack that triggered the reaction. However, if Cryo triggers MELT, it deals Pyro damage equal to 1/2 the damage of the Attack that triggered the reaction.

VAPORIZE

Pyro Swirls with Hydro to create VAPORIZE. Vaporize deals AoE DMG to the target. Vaporize has no AoE effect. Vaporize is triggered by the first element. If Hydro triggers Vaporize, it deals Hydro damage equal to 1/2 the damage of the Attack that triggered the reaction. However, if Pyro triggers Vaporize, it deals Pyro damage equal to 1/2 the damage of the Attack that triggered the reaction.

FREEZE

Cryo Swirls with Hydro to create FREEZE. Targets are frozen and can not move or attack while under the effect of Freeze. The duration is based on the level of the Character who triggers the reaction, and can last up to 5.5 seconds. Frozen targets can be BROKEN by a Character when they take Physical Damage more than a normal target.

BURNING

Capable to set off existing Damage over Time. Burning can only occur with Pyro to create BURNING. Burning does not require DMG. The damage of the attack that triggers the reaction is a Damage over Time effect.

NOTES

Elemental Reaction Damage is ALWAYS dealt by the 1st person that triggers it. Applies the Element. Electro + Pyro/Hydro have a 2 second Cooldown under the first hit. Electro-Charge sometimes lasts 2 seconds to 3 seconds. 1 hit Damage. Does not last from 1.5 seconds to 3.5 seconds. Superconduct Physical Damage Cooldown lasts from 2.5 seconds up to 8 seconds. Freezes that can be broken by a Character when they take Physical Damage more than a normal target. Try to avoid triggering reactions with too many supports because it will give DMG.

Reaction Guide:

Respiratory Reaction Guide Samuel Livingston, AI, 2025-02-21 *Respiratory Reaction Guide* provides a comprehensive overview of asthma and allergic rhinitis exploring the underlying triggers and the interplay of genetic and environmental factors influencing these conditions. It highlights that respiratory reactions are not isolated incidents but the result of a dynamic interaction between individual predisposition and environmental exposure. Interestingly, the book delves into how common allergens like pollen, pet dander, dust mites, and mold operate at a cellular level alongside irritants such as air pollution and tobacco smoke that exacerbate respiratory issues. The book progresses by first establishing a foundation in respiratory physiology and immunology before systematically examining allergens and irritants. This approach allows readers to understand how the body reacts to triggers and how genetic components influence susceptibility. It connects biology with environmental science, exploring the impact of air quality on respiratory health and the potential of genetics in personalized medicine approaches for respiratory disease management, offering healthcare professionals and affected individuals insights for better management and prevention.

Guide to Immediate Anaesthetic Reactions John B. Watkins, C. J. Levy, 2018-03-12 *Guide to Immediate Anaesthetic Reactions* serves as a practical guide to the management of adverse anesthetic response. This book provides information pertinent to the functions of anesthesia, including hypnosis, analgesia, and neuromuscular control. Organized into six chapters, this book begins with an overview of the immunological principles in anesthesia and surgery. This text then discusses mechanisms of the adverse anesthetic reactions as well as the characteristics of immune response. Other chapters consider the theory and practical management of anaphylactoid reactions, including the requirements for laboratory studies. This book presents as well a practical approach to the understanding, recognition, and management of the life-threatening reactions of anesthesia to patients. The reader is introduced to the general considerations for patients presenting with various genetic abnormalities likely to trigger abnormal response to anesthesia. The final chapter deals with the immediate adverse reactions that are related to defects of enzyme function rather than to immunity. This book is a valuable resource for anesthesiologists, surgeons, and physicians.
