Secularism Andrew Copson, 2019-07-11 Until the modern period the integration of church or other religion and state or political life had been taken for granted The political order was always tied to an official religion in Christian Europe pre Christian Europe and in the Arabic world But from the eighteenth century onwards some European states began to set up their political order on a different basis Not religion but the rule of law through non religious values embedded in constitutions became the foundation of some states a movement we now call secularism In others a de facto secularism emerged as political values and civil and criminal law altered their professed foundation from a shared religion to a non religious basis Today secularism is an increasingly hot topic in public political and religious debate across the globe It is embodied in the conflict between secular republics from the US to India and the challenges they face from resurgent religious identity politics in the challenges faced by religious states like those of the Arab world from insurgent secularists and in states like China where calls for freedom of belief are challenging a state imposed non religious worldview In this Very Short Introduction Andrew Copson tells the story of secularism taking in momentous episodes in world history such as the great transition of Europe from religious orthodoxy to pluralism the global struggle for human rights and democracy and the origins of modernity He also considers the role of secularism when engaging with some of the most contentious political and legal issues of our time blasphemy apostasy religious persecution religious discrimination religious schools and freedom of belief and freedom of thought in a divided world Previously
