Space Habitats and Habitability Sandra Häuplik-Meusburger, Sheryl Bishop, 2021-05-31 This book explores creative

solutions to the unique challenges inherent in crafting livable spaces in extra terrestrial environments The goal is to foster a constructive dialogue between the researchers and planners of future space habitats The authors explore the diverse concepts of the term Habitability from the perspectives of the inhabitants as well as the planners and social sciences The book provides an overview of the evolution and advancements of designed living spaces for manned space craft as well as analogue research and simulation facilities in extreme environments on Earth It highlights how various current and future concepts of Habitability have been translated into design and which ones are still missing The main emphasis of this book is to identify the important factors that will provide for well being in our future space environments and promote creative solutions to achieving living spaces where humans can thrive Selected aspects are discussed from a socio spatial professional background and possible applications are illustrated Human factors and habitability design are important topics for all working and living spaces For space exploration they are vital While human factors and certain habitability issues have been integrated into the design process of manned spacecraft there is a crucial need to move from mere survivability to factors that support thriving As of today the risk of an incompatible vehicle or habitat design has already been identified by NASA as recognized key risk to human health and performance in space Habitability and human factors will become even more important determinants for the design of future long term and commercial space facilities as larger and more diverse groups occupy off earth habitats The book will not only benefit individuals and organizations responsible for manned space missions and mission simulators but also provides relevant information to designers of terrestrial austere environments e g remote operational and research facilities hospitals prisons manufacturing In addition it presents general insights on the socio spatial relationship which is of interest to researchers of social sciences engineers and architects

Evo-SETI Claudio Maccone, 2021-02-26 This book offers a vision of how evolutionary life processes can be modelled It presents a mathematical description that can be used not only for the full evolution of life on Earth from RNA to modern human societies but also the possible evolution of life on exoplanets thus leading to SETI the current Search for ExtraTerrestrial Intelligence The main premise underlying this mathematical theory is that the Geometric Brownian Motion GBM can be applied as a key stochastic process to model the evolution of life In the resulting Evo SETI Theory the life of any living thing a cell an animal a human a civilization of humans or even an ET civilization is represented by a b lognormal i e a lognormal probability density function starting at a precise instant b birth then increasing up to a peak time then decreasing to senility time and then continuing as a straight line down to the time of death Using this theory Claudio Maccone arrives at remarkable hypotheses on the development of life and civilizations the possibility of extraterrestrial life and when computers will take over the reins from us humans Singularity The book develops the mathematical Evo SETI Theory by integrating a set of articles that the author has published in various journals on Astrobiology and Astronautical Research

Theories of Resistance Marcelo Lopes de Souza, Richard J. White, Simon Springer, 2016-06-17 Space is never a neutral stage on which social actors play their roles

sometimes cooperating with each other sometimes struggling against each other Space has multiple and complex functions in the development of social relations it is a reference for identity building a material condition for existence and an instrument of power This book explores the ways in which space has been used for resistance especially in left libertarian contexts From the early anarchist organizing efforts in the 19th century to the contemporary social movements of the Mexican Zapatistas the chapters examine a range of cases to illustrate both the limits and potentialities of utilizing space within anarchist practice By theorizing the production of anarchist spaces the book aims to foster new geographical imaginations that energetically cultivate alternative practices to challenge the status quo It shows that spatial re organization spatial practices and spatial resources are also a basic condition for human emancipation autonomy and freedom Beyond Chris Impey, 2015-04-06 Expansive and enlightening Impey packs his prose with wonderful anecdotes and weird factoids New York Times Book Review Human exploration has been an unceasing engine of technological progress from the first homo sapiens to leave our African cradle to a future in which mankind promises to settle another world Beyond tells the epic story of humanity leaving home and how humans will soon thrive in the vast universe beyond the earth A dazzling and propulsive voyage through space and time Beyond reveals how centuries of space explorers from the earliest stargazers to today's cutting edge researchers all draw inspiration from an innate human emotion wanderlust This urge to explore led us to multiply around the globe and it can be traced in our DNA Today the urge to discover manifests itself in jaw dropping ways plans for space elevators poised to replace rockets at a fraction of the cost experiments in suspending and reanimating life for ultra long distance travel prototypes for solar sails that coast through space on the momentum of microwaves released from the Earth With these ventures private companies and entrepreneurs have the potential to outpace NASA as the leaders in a new space race Combining expert knowledge of astronomy and avant garde technology Chris Impey guides us through the heady possibilities for the next century of exploration In twenty years a vibrant commercial space industry will be operating In thirty years there will be small but viable colonies on the Moon and Mars In fifty years mining technology will have advanced enough to harvest resources from asteroids In a hundred years a cohort of humans born off Earth will come of age without ever visiting humanity's home planet This is not the stuff of science fiction but rather the logical extension of already available technologies Beyond shows that space exploration is not just the domain of technocrats but the birthright of everyone and the destiny of generations to come To continue exploration is to ensure our survival Outer space a limitless unknown awaits us Nursing Theorists and Their Work E-Book Martha Raile Alligood, 2021-07-23 Selected for Doody's Core Titles 2024 with Essential Purchase designation in Theory Find the thinking of 39 leading nursing theorists in one comprehensive text Nursing Theorists and Their Work 10th Edition provides a clear in depth look at nursing theories of historical and international significance Each chapter presents a key nursing theory or philosophy showing how systematic theoretical evidence can enhance decision making professionalism and quality of care Lead author Martha Raile Alligood is
