Weird City Joshua Long, 2023-01-06 An examination of Austin's rapid economic and creative growth and local attitudes toward the Texas capital's transformation as an urban center Austin Texas at the beginning of the twenty first century is experiencing one of the most dynamic periods in its history Wedged between homogenizing growth and a long tradition of rebellious nonconformity many Austinites feel that they are amid a battle for the city's soul From this struggle a movement has emerged as a form of resistance to the rapid urban transformation brought about in recent years Keep Austin Weird originated in 2000 as a grassroots expression of place attachment and anti commercialization Its popularity has led to its use as a rallying cry for local business as a rhetorical tool by city governance and now as the unofficial civic motto for a city experiencing rapid growth and transformation By using Keep Austin Weird as a central focus Joshua Long explores the links between sense of place consumption patterns sustainable development and urban politics in Austin Research on this phenomenon considers the strong influence of the Creative Class thesis on Smart Growth strategies gentrification income inequality and social polarization made popular by the works of Richard Florida This study is highly applicable to several emerging Creative Cities but holds special significance for the city considered the greatest creative success story Austin

Distant Publics Jennifer Rice, 2012-08-19 Urban sprawl is omnipresent in America and has left many citizens questioning their ability to stop it In *Distant Publics* Jenny Rice examines patterns of public discourse that have evolved in response to development in urban and suburban environments Centering her study on Austin Texas Rice finds a city that has simultaneously celebrated and despised development Rice outlines three distinct ways that the rhetoric of publics counteracts development through injury claims memory claims and equivalence claims In injury claims rhetors frame themselves as victims in a dispute Memory claims allow rhetors to anchor themselves to an older deliberative space rather than to a newly evolving one Equivalence claims see the benefits on both sides of an issue and here rhetors effectively become nonactors Rice provides case studies of development disputes that place the reader in the middle of real life controversies and evidence her theories of claims based public rhetorics She finds that these methods comprise the most common though not exclusive vernacular surrounding development and shows how each is often counterproductive to its own goals Rice further demonstrates that these claims create a particular role or public subjectivity grounded in one's own feelings which serves to distance publics from each other and the issues at hand Rice argues that rhetoricians have a duty to transform current patterns of public development discourse so that all individuals may engage in matters of crisis She articulates its sustainability as both a goal and future disciplinary challenge of rhetorical studies and offers tools and methodologies toward that end
