Reproductive Restraints Reproductive Restraints:

Reproductive Restraints Sanjam Ahluwalia,2010-10-01 Reproductive Restraints traces the history of contraception use and population management in colonial India while illuminating its connection to contemporary debates in India and birth control movements in Great Britain and the United States Sanjam Ahluwalia draws attention to the interactive and relational history of Indian birth control by including western activists such as Margaret Sanger and Marie Stopes alongside important Indian campaigners In revealing the elitist politics of middle class feminists Indian nationalists western activists colonial authorities and the medical establishment Ahluwalia finds that they all sought to rationalize procreation and regulate women while invoking competing notions of freedom femininity and family Ahluwalia s remarkable interviews with practicing midwives in rural northern India fills a gaping void in the documentary history of birth control and shows that the movement has had little appeal to non elite groups in India Finding that Jaunpuri women s reproductive decisions are bound to their emotional cultural and economic reliance on family and community Ahluwalia presents the limitations of universal liberal feminist categories which often do not consider differences among localized subjects She argues that elitist birth control efforts failed to account for Indian women s values and needs and have worked to restrict reproductive rights rather than liberate subaltern Indian women since colonial times

Group Dynamics and Proximate Mechanisms of Female Reproductive Monopolization in a Cooperatively Breeding Primate, the Moustached Tamarin (*Saguinus Mystax*) Petra Löttker,2005

Reproductive States Rickie Solinger,Mie Nakachi,2016 This is a collection of case studies that explore when and how half of the twenty most populous countries in the world invented and implemented population policies It presents analyses of reproductive politics in Brazil China Egypt Germany India Iran Japan Nigeria the USSR Russia and the United States The essays focus on the official organized efforts that states pursued to facilitate state decisions about how many people and which people would be born within their borders

Reproductive Skew in Vertebrates Reinmar Hager,Clara B. Jones,2009-08-20 Skew theory investigates the genetic and ecological factors causal to the partitioning of reproduction in animal groups and may yield fundamental insights into the evolution of animal sociality This book brings together new theory and empirical work mostly in vertebrates to test assumptions and predictions of skew models

Evolutionary Restraints Mark E. Borrello,2024-05-31 Much of the evolutionary debate since Darwin has focused on the level at which natural selection occurs Most biologists acknowledge multiple levels of selection from the gene to the species The debate about group selection however is the focus of Mark E Borrello s *Evolutionary Restraints* Tracing the history of biological attempts to determine whether selection leads to the evolution of fitter groups Borrello takes as his focus the British naturalist V C Wynne Edwards who proposed that animals could regulate their own populations and thus

avoid overexploitation of their resources By the mid twentieth century Wynne Edwards became an advocate for group selection theory and led a debate that engaged the most significant evolutionary biologists of his time including Ernst Mayr G C Williams and Richard Dawkins This important dialogue bled out into broader conversations about population regulation environmental crises and the evolution of human social behavior By examining a single facet in the long debate about evolution Borrello provides powerful insight into an intellectual quandary that remains relevant and alive to this day

Reproductive Politics and the Making of Modern India Mytheli Sreenivas, 2021-06-04 Finalist for the inaugural ACLS Open Access Book Prize Calculating the cost of life in a transnational context Beginning in the late nineteenth century India played a pivotal role in global conversations about population and reproduction In Reproductive Politics and the Making of Modern India Mytheli Sreenivas demonstrates how colonial administrators postcolonial development experts nationalists eugenicists feminists and family planners all aimed to reform reproduction to transform both individual bodies and the body politic Across the political spectrum people insisted that regulating reproduction was necessary and that limiting the population was essential to economic development This book investigates the often devastating implications of this logic which demonized some women's reproduction as the cause of national and planetary catastrophe To tell this story Sreenivas explores debates about marriage family and contraception She also demonstrates how concerns about reproduction surfaced within a range of political questions about poverty and crises of subsistence migration and claims of national sovereignty normative heterosexuality and drives for economic development Locating India at the center of transnational historical change this book suggests that Indian developments produced the very grounds over which reproduction was called into question in the modern world The open access edition of Reproductive Politics and the Making of Modern India is freely available thanks to the TOME initiative and the generous support of The Ohio State University Libraries DOI 10.6069/9780295748856

The Gospel of Family Planning Nicole C. Bourbonnais, 2025-05-06 An engaging insightful history of the family planning movement and its connection to broader social and political developments across the globe Historical accounts of the twentieth century global family planning movement have largely focused on the most prominent activists and those at the helm of international organizations philanthropic foundations and government programs In The Gospel of Family Planning however historian Nicole C Bourbonnais shifts our attention to frontline workers doctors social workers nurses fieldworkers consultants church groups and volunteers who she compellingly shows played a central if complicated role Through a mix of collective biography and microhistory Bourbonnais visits clinics doorsteps and bedrooms revealing the everyday ground level workings of grassroots family planning campaigns state population control programs and the movements for reproductive rights and justice that arose to contest them Throughout the book Bourbonnais invites readers to consider how the intertwined histories of missionary work humanitarianism feminism decolonization and international development shaped intimate interventions into people's reproductive lives around the world *The Neuroendocrine*

Aspects of Reproduction Reid Norman, 2012-12-02 Neuroendocrine Aspects of Reproduction contains the proceedings of the Oregon Regional Primate Research Center's Second Symposium on Primate Reproductive Biology held in Beaverton Oregon on October 8-9 1982. The symposium provided a forum for discussing the neuroendocrinology of reproduction in primates and tackled topics ranging from delayed puberty as a factor in human evolution to gonadotropin releasing hormone neurons and pathways in the primate hypothalamus and forebrain. Comprised of 18 chapters, this book begins with an overview of some basic neuroendocrine mechanisms that influence reproductive processes, followed by a discussion on control of the onset of puberty. Control of ovulation in the rhesus macaque is considered along with hypothalamic regulation of gonadotropin secretion in women. The next section deals with reproductive cyclicity in female primates and the extent to which the central nervous system participates in the control of such cyclicity. Subsequent chapters explore the biological basis for the contraceptive effects of breastfeeding, the effects of hyperprolactinemia on reproductive function in humans, and neuroendocrine changes during menopausal flushes. This monograph will be of interest to students, practitioners, and researchers in the fields of reproductive biology, neuroendocrinology, and physiology.
