Reprogramming Japan The High Tech Crisis Under Communitarian Capitalism:

Reprogramming Japan Marie Anchordoguy, 2015-08-12 How have state policies influenced the development of Japan's telecommunications computer hardware computer software and semiconductor industries and their stagnation since the 1990s Marie Anchordoguy's book examines how the performance of these industries and the economy as a whole are affected by the socially embedded nature of Japan's capitalist system which she calls communitarian capitalism *Reprogramming Japan* shows how the institutions and policies that emerged during and after World War II to maintain communitarian norms such as the lifetime employment system seniority based wages enterprise unions a centralized credit based financial system industrial groups the main bank corporate governance system and industrial policies helped promote high tech industries When conditions shifted in the 1980s and 1990s these institutions and policies did not suit the new environment in which technological change was rapid and unpredictable and foreign products could no longer be legally reverse engineered Despite economic stagnation leaders were slow to change because of deep social commitments Once the crisis became acute the bureaucracy and corporate leaders started to contest and modify key institutions and practices Rather than change at different times according to their specific economic interests Japanese firms and the state have made similar slow incremental changes *Japan and China in the World Political Economy* Saadia Pekkanen, Kellee Tsai, 2006-06-01 Two powers in East Asia today stand to define the region's economic and commercial future Japan which rose in a spectacular industrial burst to become at present the world's second largest economy and China which is rapidly advancing towards a market economy under the watchful eye of the world While much has been made of Japan and China's particular economic institutions and developmental paths few works analyze them in a comparative framework Including contributions from leading academics the text focuses on the period from the 1980s to the onset of the 2000s reviewing the experiences of Japan and China across the areas of development trade investment finance and technology Drawing on a combination of official documents economic statistics case studies and original fieldwork this book will give political scientists political economists business concerns and policy analysts a firmer grasp of the role Japan and China stand to play in the world political economy

International Mobility, Global Capitalism, and Changing Structures of Accumulation Anthony P.

D'Costa, 2015-11-19 International mobility is not a new concept as people have moved throughout history voluntarily and forcibly for personal familial economic political and professional reasons Yet the mobility of technical talent in the global economy is relatively new largely voluntary structurally determined by market forces and influenced by immigration policies With over a decade's worth of extensive research in India Japan Finland and Singapore this book provides an alternative understanding of how capitalism functions at the global level by specifically analyzing the international movement of technical professionals between India and Japan There are three factors that inform this study the services transition away from manufacturing the movement of technical professionals in the world economy and the demographic crisis facing Japan

The dynamics of changing capitalism are examined by theorizing the emergence of the services sector in the USA and Japan analyzing the pronounced social inequality in India that is the basis for the global supply of highly skilled technical professionals and providing considerable empirical data on the flows of professionals to these two countries to indicate Japan's institutional inflexibility in accommodating foreign talent The author anticipates that Japanese industry will shed some of its institutional rigidity due to the pressures of competition and the scarcity of technical professionals Providing a wealth of information on the topic of international mobility this book is an essential addition for scholars and students in the field of International Development Business Studies Asian Studies Migration Studies and Political Economy *The ^ADigital Flood*

Dr. James W. Cortada, 2013-02-01 In this book historian James W Cortada provides the first world wide history of how computers appeared and spread to over twenty nations in less than six decades It explores economic political social and technological reasons and consequences It is based on extensive research into primary and secondary sources and concludes with a discussion of implications for key players in the globalized economy **Japanese Capitalism and**

Entrepreneurship Pierre-Yves Donzé, Julia S. Yongue, 2024-05-27 From being the last country in the world to open its doors to global trade in the 1850s to becoming the second industrialized nation in the 1960s Japan has experienced impressive economic and social development over the last two centuries In the last three decades however it became entrenched in a long phase of economic stagnation dropping from second to third place in the global economy having been overtaken by China in 2010 Inspired by the recent works on the history of capitalism this history of business shows that the Japanese company was not the product of a unique national culture Japanese capitalism was largely shaped by a political economic and institutional environment which offered a variety of new opportunities to entrepreneurs who also played a central role in the process of change Rural capitalism that formed during the period of national seclusion shifted to industrial capitalism after the opening of the nation to global trade this form of capitalism was close to those observed in other late industrializing countries and was characterized by the monopolistic domination of large business groups or zaibatsu during the interwar years The Second World War saw the emergence of wartime capitalism with the central government as the dominant actor in the economy and after 1945 the need to reconstruct the country and catch up with advanced Western economies gave birth to a new form of capitalism based on a cooperative relationship between business and the state communitarian capitalism more broadly known as the Japanese Business System The liberalization and deregulation brought new changes in the business system marked by the emergence of financial capitalism in the 1980s and 1990s **Innovation Nation C.**

Holroyd, K. Coates, 2007-11-13 This book explores Japan's efforts to promote the commercial benefits of science and technology Japan has made major scientific investments with a view to enhancing the country's medium and long term economic prospects these successful efforts have re-enforced the country's reputation as a leader in the promotion of national innovation **Critical Readings on the Liberal Democratic Party in Japan** Robert Pekkanen, 2018-10-02 This

work collects decades of the best published scholarship in English on the unequivocally most successful political party in Japanese history the Liberal Democratic Party the LDP Governing Japan for almost the entirety of the post war period the LDP also has a claim to be the most successful political party in any post war democracy Seminal articles in this collection explore the key aspects of the LDP the party s evolution since its founding in 1955 key facets of the LDP s internal organization including factions and koenkai the LDP in policy making including its relationship with the bureaucracy and interest groups as well as its policy making committee apparatus and party leadership including the premierships of Junichiro Koizumi and Shinzo Abe

Rethinking Japanese Economic Policy at the Turn of the 21st Century Junko Watanabe,2024-09-30 This book focusing on the Japanese economy mainly from the 1990s to the 2010s examines the Japanese industrial and fiscal monetary policies and evaluates its achievements and limits from a historical perspective Although the period that was also referred to as the lost decade or two three decades was marked by various policy discussions there are still few studies that summarize them as a history Another unique feature of this publication is that it includes the contributions not only from researchers but also from those who are were in a position close to the policy makers By rethinking this era many Japanese not just researchers and policy makers will be motivated to move toward a new era Many of the chapters in the book are based on the primary sources not found elsewhere including the interviews with policymakers and collection of policy documents in addition to the authors own analysis views and findings They attempt to describe policymakers struggles to exit from the long term recession after the collapse of the bubble economy seeking to get back on the trajectory for economic growth The readers will gain new factual perceptions and discoveries from these historical contexts The issues presented in this book will also contribute to the international understanding of policy efforts in Japan which is facing a frontier with high uncertainty Japan s experience and its challenges are common in many aspects to developed countries now and in the future

The Japanese Pharmaceutical Industry Maki Umemura,2011-03-02 This book explores why Japan despite being a world leader in many high technology industries such as automobiles and consumer electronics is only a minor player in the global pharmaceutical industry Japan provides a huge market for pharmaceuticals as the second largest consumer of prescription drugs after the United States and is a massive importer of prescription drugs relying on discoveries made elsewhere This book charts the development of the industry from the devastation resulting from the Second World War to its performance in the present day Focusing in particular on antibiotics and anticancer drugs the book analyses factors that have prevented Japan from leading the rapid advances in science and technology that have occurred globally over recent decades Looking at the pharmaceutical industry the book argues that the Japanese government s research and development policies were not sufficiently incentivising It also shows how the nature of capitalism in Japan which featured close relations between government and industry as well as between and within firms was appropriate for nurturing industrial development in the immediate post war decades but became much less effective in later years

Building a New Economy D. Hugh Whittaker, 2024-01-23 Japan is attempting to build a new economy. It goes by various names such as Society 5.0, sustainable capitalism, and new form of capitalism. It is to be constructed through digital and green transformation and a virtuous cycle of growth and distribution. The effort faces strong headwinds including demographic decline and ageing, Japan's external energy dependence, and geopolitical turbulence and the legacies of Japan's lost decades. Nonetheless, since 2015 a path has been identified that steers between Big Tech market oligopoly on the one hand and an overbearing state on the other. For others facing the same post-neoliberal sustainability transformation challenges as Japan, this public-private coordinated building effort is noteworthy. Building a New Economy uses an evolutionary conceptual framework of states and markets, organizations and technology, and institutional change. It shows how the institutional coherence of the manufacturing-centred postwar model broke down and was followed by the ideological and institutional dissonance of the lost decades. However, new institutional building blocks have been identified and partially assembled, which could lead Japan towards a new model which is more open and adaptive. These blocks include a reconfigured developmental state and new forms of coordination with and within the corporate sector at times encompassing civil society. Importantly, for a country that has favoured social stability over creative destruction and has struggled with change, the path forward may require controlled disequilibrium of institutions rather than tight coherence. Society 5.0 and the new form of capitalism claim to be people-centred, making them so will be the crucial challenge.
