Researching Culture Qualitative Method And Cultural Studies:

Researching Culture Pertti Alasuutari, 1995-09-27 Introducing a range of approaches and methodological tools for undertaking research this textbook argues that cultural studies transcend the traditional divisions between qualitative and quantitative method and between the social sciences and the humanities Research Methods for Cultural Studies Michael Pickering, 2008-02-22 This new textbook addresses the neglect of practical research methods in cultural studies It provides readers with clearly written overviews of research methods in cultural studies along with guidelines on how to put these methods into operation It advocates a multi method approach with students drawing from a pool of techniques and approaches suitable for their own topics of investigation The book covers the following main areas Drawing on experience and studying how narratives make sense of experience Investigating production processes in the cultural industries and the consumption and assimilation of cultural products by audiences and fans Taking both quantitative and qualitative approaches to the study of cultural life Analysing visual images and both spoken and written forms of discourse Exploring cultural memory and historical representation **Cultural Analysis** Hans Gullestrup, 2006 With internationalization the world is becoming smaller and the opportunity to meet people from other countries and cultures is becoming more common providing the need for cooperation shared knowledge and cross border trade Individual cultures tend to understand themselves best and base their understanding of the world and its peoples on ideas they each have come to believe irrespective of reality and thus make it difficult to reach a proper understanding of other cultures This book considers intercultural understanding and co action partly by means of general insights into the concept of culture and the dimensions which bring about cultural differences and partly as a methodology to analyze a certain culture whether one's own or others This leads towards an understanding of cultural complexity and cultural differences among people The book provides a discussion of a number of ethical issues which almost invariably will arise when people meet and co act across cultural boundaries Cultural Analysis offers a theoretical abstract proposal for cultural understanding intercultural plurality and complexity *Research Practice for Cultural Studies* Ann Gray, 2003 How is culture lived What are the best ways of investigating cultural life This book offers practical guidance for researching cultural studies **A Journey Through Qualitative Research** Stéphanie Gaudet, Dominique Robert, 2018-02-12 This hands on guide takes students from start to finish through the research process while showcasing the complexities and interrelationships of different methods schools of thought and associated analytical strategies Encouraging students to think of qualitative research as a flexible cyclical process rather than a linear one this book offers a panoramic strategy and dynamic approach to qualitative research that accommodates the fluid nature of research and accounts for lessons learned through lived experience With an emphasis on the analysis stage within case across case and the dialogue between these insights and existing literature it uses concrete applications to show how your methodological decisions translate into practice It covers Forming defending and evaluating research questions Choosing a

research approach Ensuring ethically sound research Collecting quality data Analyzing data in layers Reporting research results Through a conversational tone that unpacks key vocabulary and acts as a companion supervisor this book equips you to traverse every step of the qualitative research journey Qualitative Research on Sport and Physical Culture Kevin Young, Michael Atkinson, 2012-10-12 Addresses issues in methodology contemporary issues in research methods and innovative trends in qualitative research that are addressed through case study examples from areas of research in sport studies This title includes historical methods ethnography auto ethnography embodied methods interviewing and narratives
