Resident's Guide to Clinical Psychiatry Lauren B. Marangell, 2009 This concise yet comprehensive guide distills the most critical and current information on diagnosis and treatment so that residents and other beginning clinicians will have the tools they need to quickly assess and competently treat patients with psychiatric illnesses Replete with diagnostic evaluation checklists DSM IV TR criteria and drug dosage tables the Resident's Guide to Clinical Psychiatry is a practical and convenient one stop resource that will make the resident's job significantly easier Each of the 16 chapters has been structured logically and with the utmost care to guide residents through the psychiatric landscape For example the chapter on pharmacotherapy is organized by class of drug with sections on mechanism of action indications and efficacy and tips for medication selection This is followed by detailed information on specific drugs their clinical use risks side effects management and potential interactions This depth of coverage is matched by breadth of subject with chapters on central topics such as mood disorders and dementia in addition to special chapters on consultation liaison psychiatry emergency psychiatry child and adolescent psychiatry and electroconvulsive therapy and device based treatments Whether employed as a text or an on the fly reference this authoritative volume supplies everything the resident requires to provide a uniformly high level of psychiatric clinical care

A Resident's Guide to Psychiatric Education M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and international sampling of experienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans This book is intended for all students of psychiatry It is particularly valuable to residents in training but equally so for experienced clinicians preparing for Board examination or simply attending to the process of continuing education and intellectual renewal While it might well be used by an institution to delineate the dimensions of a training program in psychiatry it is intended primarily for the self evaluation and self monitoring of one's growth as a psychiatrist
